**** Short to medium-term refers to an investment horizon of one (1) to three (3) years.

What am I investing in?

Fund Category	Islamic Fixed Income
Fund Type	Income
Investment Objective	<p>AmAl-Amin aims to provide you with a regular stream of "halal" monthly income* by investing in Islamic money market instruments and Sukuk.</p> <p>Notes: Any material change to the investment objective of the Fund would require unit holders' approval. * The income could be in the form of units or cash.</p>
Investment Strategy	<p>The Fund seeks to achieve its objective by investing primarily in RM-denominated high-quality short to medium-term sukuk and Islamic money market instruments with the following minimum credit rating:</p> <ul style="list-style-type: none"> i. short-term credit rating of P2 by RAM or its equivalent as rated by a local or global rating agency; or ii. long-term credit rating of A3 by RAM or its equivalent as rated by a local or global rating agency. <p>The Fund conforms to the principles of Shariah.</p> <p>The Fund's investments are structured to mature as follows:</p> <ul style="list-style-type: none"> a. at least 10% of the investments within seven (7) days; and b. at least 20% of the investments within thirty-one (31) days. <p>Under normal circumstances, the Fund's investments will maintain a weighted average maturity of no more than one and a half (1.5) years. However, in the event of unforeseeable circumstances such as a default, restructuring or a prolonged recovery process, the Fund may hold Sukuk and Islamic money market instruments that:</p> <ul style="list-style-type: none"> i. have credit ratings lower than the minimum rating requirements; and/or ii. result in the Fund's weighted average maturity to exceed one and a half (1.5) years. <p>In the event of a credit downgrade of a Sukuk or Islamic money market instrument below the minimum rating requirement and/or where the Manager, at its discretion, assesses a likelihood of credit default, the Manager may liquidate the affected Sukuk or Islamic money market instrument. If the Manager decides to sell the Sukuk or Islamic money market instrument before its maturity, it may result in capital losses, which will be borne by the Fund and reflected in its NAV. However, the Fund reserves the right to maintain the investment if the downgrade is a temporary event.</p> <p>It is important to note that a credit downgrade indicates an increased credit risk but does not necessarily imply a default will occur. In general, a downgrade will not impact the value of the Sukuk or Islamic money market instrument at maturity, provided no credit default takes place.</p>

	<p>All income from the investments will be accrued and allocated to unit holders on a daily basis in order for the Manager to maintain a stable net asset value ("NAV") per unit of RM1.00. However, please note that the Fund is not a capital protected or capital guaranteed fund as defined under the SC Guidelines.</p> <p>The Fund is actively managed. However, the frequency of its trading strategy will depend on investment opportunities.</p>
Asset Allocation	<ul style="list-style-type: none"> At least 70% of the Fund's NAV will be invested in short-term Sukuk and Islamic money market instruments; and Up to 30% of the Fund's NAV in cash.
Base Currency	Ringgit Malaysia (RM)
Performance Benchmark	<p>Malayan Banking Berhad Al-Mudharabah (GIA) 1-Month Rate. (obtainable from: www.maybank2u.com.my)</p> <p><i>Note: The benchmark does not imply that the risk profile of the Fund is the same as the risk profile of the benchmark. Investors of the Fund will assume higher risk compared to the benchmark. Hence, the returns of the Fund may be potentially higher due to the higher risk faced by the investors.</i></p>
Launch Date	26 November 2001
Distribution Policy	<p>Subject to the availability of income, distribution will be made on a monthly basis.</p> <p>At the Manager's discretion, the Fund may distribute from its gain, income and capital. The rationale for distribution out of capital is to allow the Fund the ability to (i) distribute income on a regular basis in accordance with the distribution policy of the Fund or (ii) increase the amount of distributable income to the unit holders, after taking into consideration the risk of distributing out of capital.</p> <p>Distribution out of the Fund's capital has the effect of lowering the NAV of the Fund, may reduce part of the unit holders' original investment and may also result in reduced future returns to unit holders. When a substantial amount of the original investment is being returned to the unit holders, it has a risk of eroding the capital of the Fund and may, over time, cause the NAV of the Fund to fall. The greater the risk of capital erosion that exists, the greater the likelihood that, due to capital erosion, the value of future returns would also be diminished.</p>

Shariah Investment Principles applicable to the Fund

What are the possible outcomes of my investment?

Best Case	Income distribution.
Mid Case	No significant change in investment i.e. no income distribution.
Worst Case	Capital loss and with no income distribution.

What are the key risks associated with the Fund?

General risks associated with investing in a unit trust fund

Market Risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors resulting in a decline in a fund's NAV.
Inflation Risk	This is the risk that investors' investment in a fund may not grow or generate income at a rate that keeps pace with inflation.
Manager's Risk	This risk refers to the day-to-day management of a fund by the manager which will impact the performance of a fund.
Non-Compliance Risk	This is the risk of the manager, the investment manager or the trustee not complying with their respective internal policies, the deed and its supplemental deeds, securities law or guidelines issued by the regulators relevant to each party, which may adversely affect the performance of a fund.
Loan Financing Risk	This risk occurs when investors take a loan/financing to finance their investment. The inherent risk of investing with borrowed money includes investors being unable to service the loan repayments.
Country Risk	Investments of a fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which a fund invests in.

Suspension Risk	Refers to situation where the Manager suspends dealings of units in a fund (no redemption or subscription are allowed) under exceptional circumstances as set out in the Prospectus - Temporary suspension of determination of NAV and of the issue, switching and redemption of units. Suspension of a fund may potentially result in unit holders not being able to redeem their units into cash based on their liquidity needs and their investments will continue to be subject to the risk factors inherent in the Fund.
-----------------	---

Specific risks associated with the Fund

Credit and Default Risk	Credit risk relates to the creditworthiness of the issuers of the fixed income instruments and their expected ability to make timely payment of profit or interest and/or principal. Default risk relates to the risk that an issuer of a fixed income instrument either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the fixed income instruments.
Cancellation of Units Risk	This is the risk that occurs when the Fund suffers losses and the value of a unit of the Fund goes below RM1.00, and a consolidation exercise is carried out. A suspense account is created during the consolidation exercise where the investment loss is apportioned to each unit holder in accordance to their unit holdings. Such units will be cancelled once the consolidation exercise is completed. As a result, this will lead to a reduction in your unit holdings.
Shariah Non-Compliance Risk	This is the risk of the Fund not conforming to Shariah Investment Guidelines. Non-compliance may adversely affect the NAV of the Fund when the rectification of non-compliance results in losses.
Income Distribution Risk	The distribution of income is not guaranteed.
Liquidity Risk	Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund and consequently the value of the unit holders' investments in the Fund will be negatively affected when it has to sell such assets at unfavourable prices.
Rate of Return Risk	Rate of return risk refers to the impact of rate of return changes on the valuation of fixed income instruments. When rate of return rises, fixed income instruments prices generally decline and this may lower the market value of the Fund's investment in fixed income instruments. The reverse may apply when rate of return falls.
Counterparty Credit Risk	Counterparty credit risk is the risk arising from the possibility that the counterparty may default or not able to fulfil a trade settlement prior or on the settlement date of the trade. This could adversely affect the value of the Fund.

Note: The abovementioned risks which investors should consider before investing in the Fund should not be considered to be an exhaustive list. Investors should be aware that investments in the Fund may be exposed to other unforeseeable risks from time to time. Investors are advised to consult their professional adviser. Please refer to the Prospectus under "Risk Factors" for further details on risks.

Please note that if you invest in units through a distributor via a nominee system of ownership, you will not be deemed a unit holder under the deed of the Fund.
