- have a long term** investment horizon; and
- wish to seek exposure to China enterprises listed on the Hong Kong Stock Exchange ("SEHK").

*Note: * Distribution frequency varies by Class; for example, Class D distributes (if any) on a monthly basis, while Class A distributions are incidental and subject to income availability..*

What am I investing in?

Fund Category	Wholesale (feeder fund).
Fund Type	Income and Growth.
Investment Objective	The Fund seeks to provide income and maintain prospects for capital growth by investing in one (1) collective investment scheme. <i>Note: Any material change to the investment objective of the Fund would require unit holders' approval.</i>
Investment Strategy	The Fund seeks to achieve its investment objective by investing a minimum of 85% of the Fund's net asset value ("NAV") in the Target Fund, while the balance of the Fund's NAV will be invested in deposits and money market instruments for liquidity purposes and/or derivative for hedging purposes. This implies that the Fund has a passive strategy. The Fund will not be adopting any temporary defensive strategies in response to market conditions. All investment decisions are left with the fund manager of the Target Fund. The Manager may, in consultation with the Trustee and with the approval of the unit holders, terminate the Fund or replace the Target Fund with another fund that has similar investment objective, if in the Manager's opinion, the Target Fund no longer meets the Fund's investment objective. The Fund may utilise derivative instruments including but not limited to options, futures contracts, forward contracts and swaps for hedging purposes, where appropriate. <i>Note: A replacement of this Target Fund would require unit holder's prior approval.</i>
Asset Allocation	<ul style="list-style-type: none"> • A minimum of 85% of the Fund's NAV in the Target Fund; and • A maximum of 15% of the Fund's NAV in deposits and money market instruments for liquidity purposes and/or derivative for hedging purposes.
Base Currency of the Fund	Hong Kong Dollar ("HKD").
Launch Date	9 June 2026.
Initial Offer Period	A period of up to twenty-one (21) days commencing from 9 June 2026 to 29 June 2026. <i>Note: The Manager reserves the right to determine a shorter initial offer period and notify the Trustee. The decision for a shorter initial offer period is based on the sole discretion of the Manager. The Fund will commence on a date which the investment of the Fund may first be invested into the Target Fund.</i>
Initial Offer Price	RM Class A : RM1.0000 RM Class D : RM1.0000 RM-Hedged Class A : RM1.0000 RM-Hedged Class D : RM1.0000 HKD Class D : HKD1.0000 USD Class D : USD1.0000 SGD-Hedged Class D : SGD1.0000 AUD-Hedged Class D : AUD1.0000
Commencement Date	The date which falls on the first (1 st) business day after the expiry of the initial offer period.

Distribution Policy	<p>Class A: Subject to the availability of income, distribution (if any) is incidental. Class D: Distribution, if any, will be made on a monthly basis.</p> <p>At the Manager’s discretion, the Fund may distribute from its gain, income and capital. The rationale for distribution out of capital is to allow the Fund the ability to (i) distribute income on a regular basis in accordance with the distribution policy of the Fund or (ii) increase the amount of distributable income to the unit holders, after taking into consideration the risk of distributing out of capital.</p> <p>Distribution out of the Fund’s capital has the effect of lowering the NAV of the Fund, may reduce part of the unit holders’ original investment and may also result in reduced future returns to unit holders. When a substantial amount of the original investment is being returned to the unit holders, it has a risk of eroding the capital of the Fund and may, over time, cause the NAV of the Fund to fall. The greater the risk of capital erosion that exists, the greater the likelihood that, due to capital erosion, the value of future returns would also be diminished.</p> <p><i>Note: The Manager reserves the right to vary the frequency and/or amount of distribution (if any) for each of the Classes. Any material change to the distribution policy will be notified to unit holders in accordance with applicable regulatory requirements.</i></p>

Mid Case	No significant change in investment i.e. no capital appreciation and no income distribution.

What are the key risks associated with the Fund?

General risks associated with investing in a wholesale fund

Market Risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's net asset value.
Inflation Risk	This is the risk that sophisticated investors' investment in the fund may not grow or generate income at a rate that keeps pace with inflation.
Manager's Risk	This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund.
Non-Compliance Risk	This is the risk of the manager or the trustee not complying with their respective internal policies, the deed and its supplemental deed, securities law or guidelines issued by the regulators relevant to each party, which may adversely affect the performance of the fund when the manager or the trustee takes action to rectify the non-compliance.
Loan Financing Risk	This risk occurs when investors take a loan / financing to finance their investment. The inherent risk of investing with borrowed money includes investors being unable to service the repayments.
Country Risk	Investments of the fund in any country may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the fund invests in.
Suspension Risk	Refers to situation where the Manager suspends dealings of units in the fund (no redemption or subscription are allowed) under exceptional circumstances as set out in Information Memorandum. Suspension of the fund may potentially result in unit holders not being able to redeem their units into cash based on their liquidity needs and continue to be subject to the risk factors inherent in the fund.

Specific risks associated with the investment portfolio of the Fund

Risk of a Passive Strategy	As the Fund adopts a passive strategy of investing a minimum of 85% of its NAV into the Target Fund at all times, this strategy would result in the Fund being exposed to the risk of its NAV declining when the Target Fund's net asset value declines.
Risk of Not Meeting the Fund's Investment Objective	This is the risk that the Fund may deviate from the intended investment objective.
Secondary Trading Risk	The Target Fund is traded on the SEHK. The trading price of the Target Fund on the SEHK may differ from the net asset value per share of the Target Fund and there can be no guarantee that a liquid secondary market will exist for the Target Fund. There can be no assurance that once the Target Fund is listed on the SEHK that it will remain listed. The Manager may proceed to terminate the Fund or replace the Target Fund with another fund if the Target Fund is delisted from the SEHK and the unit holders will be notified accordingly.
Currency Risk	As the Fund offers multiple currency Classes, certain Class(es) would be exposed to currency risk. This is the risk associated with investments in certain Class(es) of the Fund which is denominated in currency different from the base currency of the Fund. While we aim to fully hedge the currency risk for a hedged Class, you should note that it may not entirely eliminate currency risk. When the base currency of the Fund depreciates against the denomination currency of certain Class(es), the Class(es) will suffer currency losses. This is in addition to any gains or losses derived from the Fund's investment in the Target Fund.
Distribution Risk	It should be noted that the distribution of income is not guaranteed.
Redemption Risk	The ability of the Fund to honour requests for redemption in a timely manner is subject to any deferral of redemptions from the Target Fund, the Fund's holding of adequate liquid assets and/or the Fund's ability to seek borrowings on a temporary basis as permitted by the relevant laws to meet redemption requests. In the event there are insufficient liquid assets, the Manager may have to liquidate the Fund's investments at an unfavourable price.
Liquidity Risk	The Fund will be investing a minimum of 85% of its assets in the Target Fund. There may be exceptional circumstances, which could cause delays in the redemption of shares of the Target Fund and units of the Fund. In the event of exceptional circumstances such as suspension of calculation of net asset value of the Target Fund, no shares of the Target Fund will be redeemed and this will result in a delay of payment of the redemption proceeds to the Target Fund and the unit holders.
Taxation Risk / Withholding Tax Risk	This is the risk that the proceeds from the sale of securities and/or the receipt of income may be subject to tax, levies, duties or other charges imposed by the authorities in HK. Tax law and practice in HK may not be clearly established. It is therefore possible that the current interpretation of the law or understanding of practice might change or that the law might be changed with retrospective effect and this may be detrimental to the Fund.
