4 RISK FACTORS

All investments carry some degree of risk. Therefore, before making an investment decision, you may consider the different types of risk that may affect the Fund or you individually.

General risks associated with investing in a wholesale fund	
Market Risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors, which will result in a decline in the fund's net asset value.
Inflation Risk	This is the risk that Sophisticated Investors' investment in the fund may not grow or generate income at a rate that keeps pace with inflation. This would reduce Sophisticated Investors' purchasing power even though the value of the investment in monetary terms has increased.
Manager's Risk	This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund. For example, investment decisions undertaken by the manager, as a result of an incorrect view of the market or any non-compliance with internal policies, investment mandate, the deed, relevant law or guidelines due to factors such as human error or weaknesses in operational process and systems, may adversely affect the performance of the fund.
Non-Compliance Risk	<p>This is the risk of the manager or the trustee not complying with their respective internal policies, the deed and its supplemental deed, securities law or guidelines issued by the regulators relevant to each party, which may adversely affect the performance of the fund when the manager or the trustee takes action to rectify the non-compliance. For example, non-compliance could occur due to factors such as human error or shortfalls in operational and administrative processes, or external factors such as market movements.</p> <p>This risk may be mitigated by having sufficient internal controls in place to ensure compliance with all applicable requirements at all times.</p>
Loan Financing Risk	This risk occurs when investors take a loan / financing to finance their investment. The inherent risk of investing with borrowed money includes investors being unable to service the repayments. In the event units are used as collateral, an investor may be required to top-up the investors' existing instalment if the prices of units fall below a certain level due to market conditions. Failing which, the units may be sold at

General risks associated with investing in a wholesale fund	
	<p>a lower net asset value per unit as compared to the net asset value per unit at the point of purchase towards settling the loan / financing.</p> <p><i>Note: The Manager does not provide financing for the purchase of units of the Fund. However, if an investor obtains financing from other providers, this is the risk that the investor should be aware of.</i></p>
Country Risk	Investments of the fund in any country may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the fund invests in. For example, the deteriorating economic condition of the countries may adversely affect the value of the investments undertaken by the fund in those affected countries. This in turn may cause the net asset value or prices of units to fall.
Suspension Risk	Refers to situation where the Manager suspends dealings of units in a fund (no redemption or subscription are allowed) under exceptional circumstances as set out in Section 6.7 Temporary suspension of determination of NAV and of the issue, switching and redemption of units. Suspension of a fund may potentially result in Unit Holders not being able to redeem their units into cash based on their liquidity needs and continue to be subject to the risk factors inherent in the Fund.
Specific risks associated with the investment portfolio of the Fund	
Stock Specific Risk	Prices of a particular stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the Fund's NAV.
Risk Associated with Investments in Equity-Related Securities	The Fund may invest in equity-related securities such as warrants that are capable of being converted into shares. As warrants are linked to the particular equity securities from which they are derived, the warrants inherit the risks linked to that underlying equity securities such as market risk, currency risk, country risk, industry risk, and liquidity risk. For investments in warrants, a movement in the prices of the underlying securities of the warrants will generally result in a larger movement in the prices of the warrants, that is, higher volatility. In the event of a decline in the market, warrants can lose a substantial amount of their values, far more than the underlying

Specific risks associated with the investment portfolio of the Fund	
	securities and vice versa. Warrants also have a limited life and if they are not exercised at the maturity, they will expire and become worthless causing the value of the Fund's investments to fall. Like any other investments, the fall in the value of the Fund's investments will ultimately lower the NAV.
Concentration Risk	This is the risk that the Fund may be overly concentrated in a few countries, industries or segment of economy. As such, developments affecting any of those countries, industries or segment of economy may affect the NAV of the Fund more adversely as compared to other funds which is more diversified across. This risk may be mitigated by diversifying the investment across the regions, industries and different segments of economy.
Interest Rate Risk	<p>Interest rate risk refers to the impact of interest rate changes on the valuation of fixed income instruments. When interest rates rise, fixed income instruments prices generally decline and this may lower the market value of the Fund's investment in fixed income instruments. The reverse may apply when interest rates fall.</p> <p>In order to mitigate interest rate risk, the Manager will need to manage the fixed income portfolio taking into account the interest rate and time to maturity of the fixed income instruments.</p> <p>For investment in deposits and money market instruments, the rise or fall of interest rates will not affect the value of the Fund if such investments are placed and held until the maturity date of the deposits and money market instruments. However, if the Fund rollovers the investment in deposits and money market instruments with lower interest rate, the Fund may be subject to interest rate risk which may affect the total return of the Fund.</p>
Distribution Risk	It should be noted that the distribution of income is not guaranteed. Circumstances preventing the distribution of income include, among others, insufficient realised gains or realised income to enable income distribution. Distribution of income (if any) should only be made from realised gains or realised income.
Liquidity Risk	Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose

Specific risks associated with the investment portfolio of the Fund	
	<p>of, the value of the Fund will be negatively affected when it has to sell such assets at unfavourable prices.</p> <p><i>Note: The Manager determines what is deemed to be reasonable trading volume for the Fund.</i></p>
Counterparty Credit Risk	Counterparty credit risk is the risk arising from the possibility that the counterparty may default or not able to fulfil a trade settlement prior or on the settlement date of the trade. This could adversely affect the value of the Fund.
Credit and Default Risk	Credit risk relates to the creditworthiness of the issuers of the fixed income instruments or money market instruments and their expected ability to make timely payment of interest and/or principal. Any adverse situations faced by the issuer may impact the value as well as liquidity of the fixed income instruments or money market instruments. In the case of rated fixed income instruments, this may lead to a credit downgrade. Default risk relates to the risk that an issuer of a fixed income instruments either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the fixed income instruments. This could adversely affect the value of the Fund.
Currency Risk	<p>As the investments of the Fund may be denominated in currencies other than the base currency, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments. Investors should be aware that if the currencies in which the investments are denominated depreciate against the base currency, this will have an adverse effect on the NAV of the Fund in the base currency and vice versa. Investors should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.</p> <p>The Manager may at its discretion hedge the currency of its foreign investments against the base currency of the Fund to mitigate currency risk for the benefit of the Fund. Note that while hedging assists with mitigating the potential foreign exchange losses by the Fund, any potential gains from the hedging strategy will be capped as well.</p>

Note: The abovementioned risks which Sophisticated Investors should consider before investing into the Fund should not be considered to be an exhaustive list. Sophisticated Investors should be aware that investments in the Fund may be exposed to other risks of an exceptional nature from time to time.

Risk Management Strategy

Risk management of the Fund forms an integral part of the investment process. The Fund's portfolio is constructed and managed within pre-determined guidelines including risk returns trade-off, which will be reviewed periodically by the Manager. Assessment of risk is an important part of the asset allocation process. The Manager has the discretion to select instruments / securities from the authorised investment list.

When deemed necessary, the Manager may also utilise derivatives, subject to SC Guidelines, for the purpose of hedging. In the event of a downgrade of a counterparty of an OTC derivative below the minimum credit rating as per the SC Guidelines, the Manager should, within six (6) months or sooner, if the Trustee considers it to be in the best interest of the Unit Holders, the Manager would deliberate a recommended and appropriate action to mitigate risk associated with such OTC derivative and may extend to unwinding of such OTC derivative if there is a need to terminate current position to ensure compliance with the SC Guidelines.

In respect of liquidity risk management, the Manager identifies, monitors and mitigates liquidity risks of the Fund on an on-going basis to ensure that the liquidity profile of the Fund's investments is able to comply with the SC's regulator requirement to meet redemption proceeds within a stipulated period. In doing so, the Manager will consider factors which include liquidity of the Fund's holdings, any investor concentration and the Fund's ability to respond to any sizeable redemptions, if any.

The Manager may combine the following liquidity management tools:

- Borrowing of up to 10% of the Fund's NAV from financial institutions. Please refer to Section 6.7 Borrowing / Financing on page 37 for further information.
- Suspension of dealing of units of the Fund (due to exceptional circumstances, where there is good and sufficient reason to do so, considering the interests of Unit Holders) as a last resort after all other liquidity risk management tools have been exhausted. Any redemption request received by us during the suspension period will only be accepted and processed on the next Business Day after the cessation of suspension of the Fund. Please refer to Section 6.7 Temporary Suspension of Determination of NAV and of the Issue, Switching and Redemption of Units on page 35 for further information.

5 FEES, CHARGES AND EXPENSES

Unless stated otherwise, all fees, charges and/or expenses disclosed in the Information Memorandum are exclusive by way of example and not limitation; goods and services tax, value added tax, consumption tax, levies, duties and other taxes as may be imposed by the Government of Malaysia from time to time (collectively known as “Taxes”). If these fees, charges and/or expenses are subject to any Taxes, such Taxes shall be borne and payable by the Unit Holders and/or the Fund (as the case may be) at the prevailing rate, including any increase or decrease to the rate, in addition to the fees, charges and/or expenses stated herein.

Switching Fee*Switching between funds managed by the Manager*

For switches between any of the funds managed by the Manager, Unit Holders will be charged on the differences of the entry charge between funds switched, which is up to a maximum of 6% of NAV per unit of the fund switched into. No entry charge will be imposed if the fund to be switched into has a lower entry charge.

Switching between Class(es) of the Fund

Unit Holders are allowed to switch between Class(es) of the Fund, provided that the Class(es) is denominated in the same currency.

5.2 Ongoing Fees and Expenses

Due to the multiple Classes in the Fund, the fees and expenses for the Fund are apportioned based on the size of the Class relative to the whole Fund. This means the multi-class ratio ("MCR") is calculated by taking the "Opening Value of a Class" for a particular day and dividing it with the "Opening Value of the Fund" for that same day. This apportionment is expressed as a ratio and calculated as a percentage.

As an illustration, assuming there is an indirect fee chargeable to the Fund of USD100 and the size of the USD Class is 40%, RM-Hedged Class is 30%, AUD Class is 15% and SGD Class is 15% of the Fund, the ratio of the apportionment based on the percentage will be 40:30:15:15 (USD:RM-Hedged:AUD:SGD) i.e. 40% being borne by USD Class, 30% being borne by RM-Hedged Class, 15% being borne by AUD Class and SGD Class respectively.

"Opening Value of the Fund" refers to the NAV of the Fund before income and expenses.

"Opening Value of a Class" refers to the NAV of a Class before income and expenses.

The fees and expenses that you may **indirectly** incur are as follows.

(a) Annual Management Fee

An annual management fee of up to 1.50% p.a. of the Fund's NAV is charged and then apportioned to each Class based on the MCR. The management fee is calculated on a daily basis and will be paid monthly to us. An illustration of the calculation and apportionment of the daily management fee is as follows:

Assuming the NAV of the Fund is USD100 million, then the daily accrued management fee for the day would be:

	<u>USD</u>
Investments	60,000,000.00
Others (Liquid assets)	40,000,000.00
NAV (before fees)	<u>100,000,000.00</u>

Management fee for the day:

$$[(\text{Investments} + \text{Liquid assets}) \times \text{Management fee}] \div \text{Number of days in a year}$$

$$= (\text{USD}100,000,000.00 \times 1.50\%) \div 365 \quad 4,109.59$$

Class-level apportionment (assumed ratio: USD:RM-Hedged, 60:40)

USD Class	2,465.75
RM-Hedged Class	1,643.84
Total	4,109.59

(b) Annual Trustee Fee

The Trustee is entitled to an annual trustee fee for acting as trustee for the Fund. This fee is calculated daily and paid monthly. The trustee fee is up to 0.045% p.a. of the NAV of the Fund (excluding foreign sub-custodian fee and charges, where applicable). An illustration of the trustee fee per day is as follows:

Assuming the NAV of the Fund is USD100 million and the trustee fee is 0.045% p.a. of the NAV of the Fund, then the daily accrued trustee fee would be:

	<u>USD</u>
Trustee's fee for the day charged to the Fund:	
$(\text{NAV of the Fund} \times \text{Trustee fee}) \div \text{Number of days in a year}$	
$= (\text{USD}100,000,000.00 \times 0.045\%) \div 365$	123.29
Class-level apportionment (assumed ratio: USD:RM-Hedged, 60:40)	
USD Class	73.97
RM-Hedged Class	49.32
Total	123.29

(c) Fund Expenses

The Manager and the Trustee may be reimbursed out of the Fund for any cost reasonably incurred in the administration of the Fund. The Fund's expenses currently include but are not limited to audit fees, tax agent's fees, printing and postages of annual and quarterly reports, bank charges, investment committee fee for independent members, lodgement fees for Fund's reports, outsourced fund accounting fee, foreign custodians' charges (if any) in respect of any foreign investments of the Fund, fees paid to brokers or dealers (if any) and other expenses as permitted by the Deed.

THERE ARE FEES AND CHARGES INVOLVED AND SOPHISTICATED INVESTORS ARE ADVISED TO CONSIDER THEM BEFORE INVESTING IN THE FUND. YOU SHOULD NOT MAKE PAYMENT IN CASH TO A UNIT TRUST CONSULTANT OR ISSUE A CHEQUE IN THE NAME OF A UNIT TRUST CONSULTANT.

6 TRANSACTION INFORMATION

6.1 Valuation of Assets

In undertaking any of its investments, the Manager will ensure that all the assets of the Fund are valued at fair value in compliance with the SC guidelines and relevant laws at all times. Investments of the Fund are valued in accordance to the following:

- i. Listed equities, warrants and options
The valuation for any investment in listed equities, warrants or options shall be based on the last market price quoted from respective exchanges.
- ii. Unlisted equities
The valuation for unlisted equities shall be based on methods deemed to be fair and reasonable that are acceptable by the Manager, verified by the auditor of the Fund and approved by the Trustee.
- iii. Listed fixed income instruments and quoted on an exchange
The valuation for investment in listed fixed income instruments shall be determined by reference to the market price (i.e. official closing price or last known transacted price on the eligible market on which the investment is quoted).

However, if –

1. the market price does not represent the fair value of the fixed income instruments, for example during abnormal market conditions; or
2. no market price is available, including in the event of a suspension in the quotation of the fixed income instruments for a period exceeding fourteen (14) days, or such shorter period as agreed by the Trustee,

then the fixed income instruments should be valued at fair value, as determined in good faith by the Manager, based on the methods or bases approved by the Trustee after appropriate technical consultation.

iv. Unlisted fixed income instruments

For unlisted RM denominated fixed income instruments, valuation is based on prices provided by the Bond Pricing Agency (BPA) registered with the SC or where prices are not available from BPA, the average indicative yield quoted by three (3) independent and reputable institutions. Where the Manager is of the view that the price quoted by BPA for a specific fixed income instrument differs from “market price” by more than 20 basis points, the Manager may use the “market price”, provided that the Manager:

- (i) records its basis of using a non-BPA price;
- (ii) obtains necessary internal approvals to use the non-BPA price; and
- (iii) keeps an audit trail of all decisions and basis for adopting the “market yield”.

For unlisted foreign currency denominated fixed income instruments, valuation is based on the Refinitiv Evaluated Pricing quoted by Refinitiv. Where Refinitiv’s

prices are not available, these unlisted foreign currency denominated fixed income securities will be valued at fair value, as determined in good faith by the Manager based on the method or bases verified by the auditor of the Fund and approved by the Trustee.

(v) Listed collective investment schemes

The valuation for investment in listed collective investment schemes shall be determined by reference to the market price (i.e. official closing price or last known transacted price on the eligible market on which the investment is quoted). However, if –

- a) the market price does not represent the fair value of the listed collective investment schemes, for example during abnormal market conditions; or
- b) no market price is available, including in the event of a suspension in the quotation of the listed collective investment schemes for a period exceeding fourteen (14) days, or such shorter period as agreed by the Trustee,

then the listed collective investment schemes should be valued at fair value, as determined in good faith by the Manager, based on the methods or bases approved by the Trustee after appropriate technical consultation.

(vi) Money market instruments

The value of any investment in deposits placed with financial institutions shall be determined on each Business Day, with reference to the principal value of such investments and the accrued income for the relevant period.

For money market instruments (such as negotiable certificates of deposits and promissory notes), the valuation is based on marked to market prices as provided by the counterparty that issues the instruments.

For money market instruments with remaining term to maturity of not more than ninety (90) calendar days at the time of acquisition, amortised cost accounting shall be used. The Manager shall have in place adequate measures and safeguards to properly address relevant risks associated with the use of amortised cost accounting.

(vii) Derivatives

The valuation is based on marked to market prices. The methods or bases of valuation will have to be verified by the auditor of the Fund and approved by the Trustee.

6.2 Pricing and Valuation Points

The Fund adopts a single pricing policy i.e. subscription and redemption of units will be carried out at the NAV per unit. The valuation point of the Fund will be on daily basis (e.g. each Business Day).

The Fund also adopts forward pricing which means price for units will be calculated at the next valuation point after the complete documentation is received by the Manager.

Valuation point refers to such time(s) on a Business Day as may be decided by the Manager wherein the NAV per unit of the relevant Class(es) is calculated.

Since the Fund may invest in foreign markets, the valuation of the Class(es) will be carried out on the next Business Day (T+1) by 5.00 p.m. This is to cater for the currency translation of the foreign securities/instruments to the Fund's base currency based on the bid exchange rate quoted by Bloomberg or Refinitiv at 4.00 pm (UK time) which is equivalent to 11.00 pm or 12.00 am midnight (Malaysian time) on the same day, or such other time as stipulated in the Investment Management Standards issued by the Federation of the Investment Managers Malaysia (FIMM).

A Sophisticated Investor will buy units at the NAV per unit of the relevant Class as at the next valuation point after an instruction for purchase is received plus applicable entry charge of the Class; and redemption will be calculated based on the NAV per unit of the relevant Class as at the next valuation point after an instruction for redemption is received.

Incorrect Pricing

In the event of any incorrect pricing of units of the Class(es), the Manager shall take immediate remedial action to rectify the incorrect pricing. Where the incorrect pricing:

- (1) is equal or more than zero point five per centum (0.50%) of the NAV per unit; and
- (2) the total impact on an individual account is more than RM 10.00 or its foreign currency equivalent in absolute amount.

then the Manager shall reimburse the relevant Class and/or the affected Unit Holder in the following manner:

- (a) where the error is as a result of over valuation (i.e. the price quoted is higher than the actual price), the Manager shall reimburse:
 - (i) the relevant Class (for the difference between the redemption amount paid out by the relevant Class and the amount per the amended valuation); and/or
 - (ii) the Unit Holders (for the difference between the value of subscription amount paid by the Unit Holder and the amount per the amended valuation).
- (b) where the error is as a result of under valuation (i.e. the price quoted is lower than the actual price), the Manager shall reimburse:
 - (i) the relevant Class (for the difference between the value of subscription amount paid by the Unit Holder and the amount per the amended valuation); and/or

- (ii) the Unit Holders (for the difference between the redemption amount paid out by the relevant Class and the amount per the amended valuation).

Subject to any regulatory requirements, the Manager shall have the right to amend, vary or revise the above said limits or threshold from time to time.

Policy on rounding adjustment

The NAV per unit for the Fund is rounded to four (4) decimal points. Redemption proceeds, units created, fees and charges are rounded to two (2) decimal points.

NAV per unit of the Class(es)

Due to the multiple Classes in the Fund, the valuation of the Fund will be done in the Fund's base currency i.e. USD. As such, all assets and/or cash that are not denominated in USD will be converted to USD for valuation purposes. The foreign exchange rate used for this purpose shall be based on the bid exchange rate quoted by Bloomberg or Refinitiv at 4.00 pm (UK time) which is equivalent to 11.00 pm or 12.00 midnight (Malaysian time) on the same day, or such other time as stipulated in the Investment Management Standards issued by the FiMM.

- (a) is required by the relevant authorities;
- (b) is in the best interests of Unit Holders and the Manager in consultation with the Trustee deems it to be uneconomical for the Manager to continue managing the Fund; or
- (c) is a result of small Fund size, i.e. NAV is less than RM20 million or such other amount as the Manager and the Trustee may jointly deem it to be uneconomical for the Manager to continue managing the Fund.

Notwithstanding the aforesaid, if the Fund is left with no Unit Holders, the Manager shall be entitled to terminate the Fund.

Upon the termination of the trust by the Manager, the Manager shall give to each Unit Holder of the Fund being wound up a notice of such termination in accordance with the relevant laws; the Manager shall notify the existing Unit Holders in writing of the following options:
