

Fund Overview

Investment Objective

AmDynamic Allocator (the "Fund") aims to achieve capital growth over the medium to long-term** and at the same time provide income* by investing primarily in collective investment schemes ("CIS").

The Fund is suitable for investors:

- seeking potential capital growth with yearly income*;
- with medium to long-term** investment horizon; and
- seeking to invest in a fund that potentially gives higher return than fixed deposit rates.

Notes: *The income (if any) could be in the form of units or cash.

**Medium to long-term refers to a period of at least three (3) years.

Any material change to the investment objective of the Fund would require Unit Holders' approval.

The returns presented are net of all relevant fees, charges, and costs associated with the unit trust investment. These may include, but are not limited to, management fees, trustee fees, and other applicable charges. Over time, such fees and charges can materially reduce the overall returns on your investment.

It is important to note that the sales charge is deducted upfront and directly reduces the amount of the initial investment that is allocated to the fund, which in turn can have the effect of lowering returns to investors in the long run. These costs may be deducted from your investment amount, from the returns generated, or directly from the Fund's assets, and are reflected in the unit price (NAV per unit). This includes expenses related to the marketing and distribution of the Fund. Additionally, all fees and charges payable to the Manager and the Trustee are subject to applicable taxes and/or duties, which may vary from time to time as imposed by the government.

Given the impact these costs can have on your investment returns, investors are strongly advised to read and understand the contents of the Fund's prospectus and consider the cumulative impact of these costs before making any investment decision.

Past performance is not necessarily indicative of future performance and that unit prices and investment returns may go down, as well up.
