What is the Fund about?

AmIncome Management is a fixed income fund issued by AmFunds Management Berhad ("Manager") which aims to provide income* and liquidity** over the short to medium-term***.

Who is the Fund suitable for?

The Fund is suitable for investors seeking:

- potential capital preservation^;
- an investment with short to medium-term*** investment horizon; and
- a liquid** fixed income portfolio.

Note:

* *Income distribution (if any) will be reinvested.*

** *Liquidity means that investor may receive their withdrawal proceeds within 2 business days after redemption application is received by the Manager on or before the cut-off time.*

*** *Short to medium-term refers to an investment horizon of 1 to 3 years.*

^ *Capital preservation does not mean that the capital is guaranteed or protected.*

What am I investing in?

Fund Category	Fixed Income.
Fund Type	Income.
Investment Objective	The Fund is a fixed income fund which aims to provide income* and liquidity** over the short to medium-term. *Notes:* *Any material change to the investment objective of the Fund would require unit holders' approval.* ** Income distribution (if any) will be reinvested.* *** Liquidity means that investor may receive their withdrawal proceeds within 2 business days after redemption application is received by the Manager on or before the cut-off time.*
Investment Strategy	To achieve the investment objective, the Fund will invest primarily in fixed income instruments such as sovereign, quasi-sovereign and corporate bonds, accepted bills, negotiable instrument of deposits, repurchase agreement (Repo) and deposits with financial institutions. The fixed income instruments and their respective issuers (including but not limited to financial institutions) may or may not be rated. The fixed income instruments must have a minimum short-term credit rating of P3 by RAM Rating Services Berhad ("RAM") or its equivalent as rated by a local or global rating agency. A minimum of 5% of the Fund's net asset value ("NAV") will be maintained in liquid assets. In managing the Fund, the Manager may opt to invest in the investments either directly or via collective investment schemes. The Manager first will analyze the general economic and market conditions and select fixed income instruments: • that may deliver better yields by comparing parameters such as credit rating and duration; • which have improving outlook on their credit rating; and/or • within industries with improving outlook. The Manager will manage the portfolio by taking into account the coupon rate and time to maturity of the investments. However, the weighted duration of the Fund's portfolio will not be more than three (3) years. In the event of a credit downgrade of a fixed income instrument below the minimum rating requirement or where the Manager at its discretion feels that there is a likelihood of credit default, the Manager may liquidate the particular fixed income instrument which was affected within a specific period. A credit downgrade means that credit risk has increased but it does not mean that there will be a default. A credit downgrade will generally have no impact on the value of the fixed income instrument upon its maturity if credit default did not occur. However,

	if the Manager chooses to sell the fixed income instrument prior to its maturity, it may result in capital losses and these losses will be borne by the Fund and reflected in its NAV. The Fund is actively managed. However, the frequency of its trading strategy will depend on investment opportunities.
Asset Allocation	• 70% to 95% of the Fund's NAV will be invested in fixed income instruments; and • At least 5% of the Fund's NAV will be invested in liquid assets.
Base Currency	Ringgit Malaysia (RM).
Performance Benchmark	AmBank (M) Berhad 12-month conventional fixed deposit rate. *(obtainable via www.ambankgroup.com)* *Note: The risk profile of the Fund's investment is higher than the risk profile of the performance benchmark and consequently, the Fund is expected to outperform the performance benchmark.*
Launch Date	2 December 2013.
Distribution Policy	Subject to the availability of income, distribution is paid at least twice every year and will be reinvested. At the Manager's discretion, the Fund may distribute from its gain, income and capital. The rationale for distribution out of capital is to allow the Fund the ability to (i) distribute income on a regular basis in accordance with the distribution policy of the Fund or (ii) increase the amount of distributable income to the unit holders, after taking into consideration the risk of distributing out of capital. Distribution out of the Fund's capital has the effect of lowering the NAV of the Fund, may reduce part of the unit holders' original investment and may also result in reduced future returns to unit holders. When a substantial amount of the original investment is being returned to the unit holders, it has a risk of eroding the capital of the Fund and may, over time, cause the NAV of the Fund to fall. The greater the risk of capital erosion that exists, the greater the likelihood that, due to capital erosion, the value of future returns would also be diminished.

Who am I investing with?

Manager	:	AmFunds Management Berhad ("AFM")
Trustee	:	Deutsche Trustees Malaysia Berhad ("DTMB")
Trustee's Delegate (Custodian)	:	Deutsche Bank (Malaysia) Berhad ("DTMB")

What are the possible outcomes of my investment?

Best Case	Income distribution and capital appreciation.
Mid Case	No significant change in investment i.e. no income distribution and no capital appreciation.
Worst Case	Capital loss and with no income distribution.

What are the key risks associated with the Fund?

General risks associated with investing in a unit trust fund

Market Risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors resulting in a decline in a fund's NAV.
Inflation Risk	This is the risk that investors' investment in a fund may not grow or generate income at a rate that keeps pace with inflation.
Manager's Risk	This risk refers to the day-to-day management of a fund by the manager which will impact the performance of a fund.
Non-Compliance Risk	This is the risk of the manager, the investment manager or the trustee not complying with their respective internal policies, the deed and its supplemental deeds, securities law or guidelines issued by the regulators relevant to each party, which may adversely affect the performance of a fund.
Loan Financing Risk	This risk occurs when investors take a loan / financing to finance their investment. The inherent risk of investing with borrowed money includes investors being unable to service the loan repayments.
Country Risk	Investments of a fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which a fund invests in.
Suspension Risk	Refers to situation where the Manager suspends dealings of units in a fund (no redemption or subscription are allowed) under exceptional circumstances as set out in the Prospectus - Temporary suspension of determination of NAV and of the issue, switching and redemption of units. Suspension of a fund may potentially result in unit holders not being able to redeem their units into cash based on their liquidity needs and their investments will continue to be subject to the risk factors inherent in the Fund.

Specific risks associated with the Fund

Credit and Default Risk	Credit risk relates to the creditworthiness of the issuers of the fixed income instruments and their expected ability to make timely payment of profit or interest and/or principal. Default risk relates to the risk that an issuer of a fixed income instrument either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the fixed income instruments.
Interest Rate Risk	Interest rate risk refers to the impact of interest rate changes on the valuation of fixed income instruments. When interest rates rise, fixed income instruments prices generally decline and this may lower the market value of the Fund's investment in fixed income instruments. The reverse may apply when interest ratesfall.
Income Distribution Risk	The distribution of income is not guaranteed.
Liquidity Risk	Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund and consequently the value of the Unit Holders' investments in the Fund will be negatively affected when it has to sell such assets at unfavourable prices.
Counterparty Credit Risk	Counterparty credit risk is the risk arising from the possibility that the counterparty may default or not able to fulfill a trade settlement prior or on the settlement date of the trade. This could adversely affect the value of the Fund.

Note: The abovementioned risks which investors should consider before investing in the Fund should not be considered to be an exhaustive list. Investors should be aware that investments in the Fund may be exposed to other unforeseeable risks from time to time. Investors are advised to consult their professional adviser. Please refer to the Prospectus under "Risk Factors" for further details on risks.

Please note that if you invest in units through a distributor via a nominee system of ownership, you will not be deemed a unit holder under the deed of the Fund.

What are the fees and charges involved?

There are fees and charges involved and you are advised to consider them before investing in the Fund.

What will I be charged by AFM?

Entry Charge	There is no entry charge for this Fund.
Exit Penalty	There is no exit penalty for this Fund.
Transfer Fee	Nil.
Bank Charges/Fees	Bank charges or fees are incurred only upon withdrawals.
Switching Fee	For switches between any of the funds managed by AFM, investors will be charged on the differences of entry charge between funds switched, which is up to a maximum of 6% of NAV per unit of the fund switched into. No entry charge will be imposed if the fund to be switched into has a lower entry charge. However, the Manager has the discretion to waive or reduce the switching fee. Switching may also be subject to an exit penalty should the fund switched out impose an exit penalty.

What are the key ongoing fees charged to the Fund?

Annual Management Fee	Up to 0.75% per annum of the NAV of the Fund.
Annual Trustee Fee	Up to 0.08% per annum of the NAV of the Fund, subject to a minimum fee of RM10,000 per annum.

Note: Unless stated otherwise, all fees, charges and/or expenses disclosed in the Product Highlights Sheet are exclusive by way of example and not limitation; goods and services tax, value added tax, consumption tax, levies, duties and other taxes as may be imposed by the Government of Malaysia from time to time (collectively known as "Taxes"). If these fees, charges and/or expenses are subject to any Taxes, such Taxes shall be borne and payable by the unit holders and/or the Fund (as the case may be) at the prevailing rate, including any increase or decrease to the rate, in addition to the fees, charges and/or expenses stated herein.

You are advised to consider the fees and charges involved before investing in the Fund. Unit prices and distributions, if any, may go down as well as up.

How will I be notified of any increase in fees and charges?

- A written communication will be sent to unit holders to notify of the higher rate and its effective date; and
- A supplementary or replacement prospectus will be registered and issued.

How often are valuations available?

We publish updated information on our website **www.aminvest.com**; and the NAV per unit of the Fund is sent to the Federation of Investment Managers Malaysia ("FIMM") in order for it to be published in major newspapers on a daily basis.
