MANAGER'S REPORT

Dear Unitholder,

We are pleased to present you the Manager's report and the unaudited quarterly accounts of AmlIncome Value SRI (*formerly known as AmlIncome Value*) ("Fund") for the financial period from 1 April 2026 to 30 June 2026.

Salient Information of the Fund

Name	AmlIncome Value SRI (<i>formerly known as AmlIncome Value</i>) ("Fund") <i>"Income" depicts that the Fund will invest predominantly in fixed income instruments which is aligned with the fund's objective and strategy.</i> <i>"Value" means that the Fund will grow in its intrinsic worth as time goes by because its objective is to achieve steady growth from the capital appreciation and income received from the securities coupon (without distribution) by investing in fixed income instruments.</i>																																					
Category/ Type	Wholesale Fixed Income / Growth																																					
Objective	The Fund aims to provide steady growth by investing in short to medium term fixed income instruments, fixed deposits and other permitted investments. <i>Note: Any material change to the investment objective of the Fund would require Unit Holders' approval.</i>																																					
Duration	The Fund was established on 15 September 2010 and shall exist for as long as it appears to the Manager and the Trustee that it is in the interests of the unitholders for it to continue. In some circumstances, the unitholders can resolve at a meeting to terminate the Fund.																																					
Performance Benchmark	RAM Quantshop 1-5 years MGS Index plus 50 basis points (over 3 year rolling period) (Available at www.aminvest.com)																																					
Income Distribution Policy	Income distribution (if any) will be reinvested. <i>Note: Should there be realized income or gain there may be income to be declared.</i>																																					
Breakdown of Unit Holdings by Size	For the financial period under review, the size of the Fund stood at 196,422,285 units. <table border="1"> <thead> <tr> <th rowspan="2">Size of holding</th><th colspan="2">As at 30 June 2026</th><th colspan="2">As at 31 March 2026</th></tr> <tr> <th>No of units held</th><th>Number of unitholder</th><th>No of units held</th><th>Number of unitholder</th></tr> </thead> <tbody> <tr> <td>5,000 and below</td><td>-</td><td>-</td><td>-</td><td>-</td></tr> <tr> <td>5,001-10,000</td><td>-</td><td>-</td><td>-</td><td>-</td></tr> <tr> <td>10,001-50,000</td><td>-</td><td>-</td><td>-</td><td>-</td></tr> <tr> <td>50,001-500,000</td><td>-</td><td>-</td><td>-</td><td>-</td></tr> <tr> <td>500,001 and above</td><td>196,422,285</td><td>1</td><td>194,432,332</td><td>1</td></tr> </tbody> </table>				Size of holding	As at 30 June 2026		As at 31 March 2026		No of units held	Number of unitholder	No of units held	Number of unitholder	5,000 and below	-	-	-	-	5,001-10,000	-	-	-	-	10,001-50,000	-	-	-	-	50,001-500,000	-	-	-	-	500,001 and above	196,422,285	1	194,432,332	1

The Fund performance is calculated based on the net asset value per unit of the Fund. Average total return of the Fund and its benchmark for a period is computed based on the absolute return for that period annualised over one year.

Note: Past performance is not necessarily indicative of future performance and that unit prices and investment returns may go down, as well as up.

Fund Performance

For the financial period under review, the Fund registered a return of 0.79% comprising of negative 0.19% capital and 0.98% income distributions.

Thus, the Fund’s return of 0.79% has underperformed the benchmark’s return of 1.01% by 0.22%.

As compared with the financial period ended 31 March 2026, the net asset value (“NAV”) per unit of the Fund decreased by 0.20% from RM1.0199 to RM1.0179, while units in circulation increased by 1.02% from 194,432,332 units to 196,422,285 units.

The following line chart shows the comparison between the annual performances of AmlIncome Value SRI (formerly known as AmlIncome Value) and its benchmark for the financial years ended 31 December.

Rebates and Soft Commission	During the period, the management company did not receive soft commissions by virtue of transactions conducted for the Fund.																
Market Review	In April 2026, the Malaysian bond market strengthened, with Malaysian Government Securities (MGS) yields declining by 4–8 bps across the curve on the back of supportive domestic fundamentals. Bank Negara Malaysia (BNM) maintained the Overnight Policy Rate (OPR) at 2.75%, while subdued inflation and stronger-than-expected 1Q2026 Gross Domestic Product (GDP) growth supported investor confidence. Demand for sovereign bond and sukuk auctions was robust, with bid-to-cover (BTC) ratios ranging between 2.03x and 2.92x. Foreign sentiment also improved significantly, with RM3.8 billion of net inflows into government bonds in March, lifting foreign ownership of MGS and Malaysia Government Investment Issues (MGII) to 21.6%. However, MGS yield curve bear-flattened in May as yields rose mainly in the 3–7-year segment, while longer-dated bonds were largely unchanged. Although the month began positively following BNM’s decision to keep rates unchanged and easing Gulf tensions, sentiment weakened later as persistent geopolitical risks and higher energy prices reignited inflation concerns, leading to a broader global bond sell-off. Despite the challenging backdrop, sovereign bond and sukuk auctions remained well supported, with BTC ratios ranging between 2.28x and 2.87x. Foreign holdings of Ringgit bonds continued to rise, increasing by a further RM3.8 billion in April, driven primarily by inflows into private debt securities. In June 2026, yields are higher across tenors amid a weaker external rates environment and continued geopolitical uncertainty. Sentiment softened during the month due to rising energy prices and higher global yields. Nevertheless, investor demand for primary issuances remained strong, with four sovereign bond and sukuk auctions recording BTC ratios between 1.93x and 3.41x. Foreign holdings of Ringgit bonds declined by RM4.3 billion in May, reflecting profit-taking and weaker regional risk appetite. Meanwhile, corporate bond trading activity rebounded by 7.6% month-on-month to RM18.7 billion, supported by improved secondary market valuations and post-holiday trading activity. The Malaysian bond market remained notably resilient in the second quarter of 2026, successfully navigating a backdrop of heightened geopolitical uncertainty and evolving global interest rate expectations. Investor demand for sovereign bond and sukuk issuances remained consistently robust, underscoring confidence in Malaysia’s sound macroeconomic fundamentals, credible policy framework, and well-established domestic institutional investor base. The market’s ability to absorb																

	supply efficiently while maintaining orderly trading conditions reflects the depth and stability of Malaysia's fixed income landscape, reinforcing its attractiveness within the regional investment universe.
Market Outlook	Malaysia's macroeconomic backdrop remains broadly supportive heading into July 2026, although market conditions are becoming increasingly nuanced amid evolving global and domestic developments. Domestic growth is expected to remain resilient, underpinned by steady private consumption, ongoing investment activity, and continued implementation of government development initiatives. However, external demand may face headwinds from a slower and less synchronised global growth environment, potentially tempering export momentum in the coming quarters. Inflation remains generally contained, supported by easing cost pressures and stable domestic demand conditions. Nevertheless, lingering core inflation risks warrant continued monitoring. Against this backdrop, Bank Negara Malaysia (BNM) is expected to maintain a data-dependent approach, balancing the need to support growth while preserving price stability. For the bond market, global interest rate expectations remain the key driver of local sentiments. The pace and extent of policy tightening by major developed market central banks, alongside evolving geopolitical and trade-related developments, are likely to influence capital flows, investor risk appetite and local yield movements. While Malaysian Government Securities continue to benefit from supportive domestic liquidity and stable fundamentals, yields are expected to remain range-bound with periodic volatility arising from external developments and primary supply dynamics.

The Fund may invest up to 30% of the Fund’s NAV in Malaysian government securities. Notwithstanding the above, the aggregate value of the Fund’s investment in Malaysian government securities, cash, deposits and money market instruments shall not exceed 30% of the Fund’s NAV. In the unlikely event of a bond credit rating downgrade below the stipulated

		minimum, the Manager reserves the right to hold the affected fixed income instruments until its maturity if it is in the best interest of the Unit Holders. A credit downgrade generally will have no impact on the fixed income instruments upon its maturity if credit default does not occur. The Fund may increase its exposure in cash, deposits and money market instruments which may differ from the Fund's strategies and asset allocation for defensive purposes during periods of market volatility to protect the portfolios from a drop in market value as well as for liquidity to meet any large redemptions in a bear market. The Manager will ensure that at least two-thirds (2/3) of the Fund's NAV are in line with the sustainability considerations during the temporary defensive position. The Fund also incorporates sustainability considerations in securities or instruments selection (including instruments issued under their respective green, social and sustainability ("GSS") bond framework), by investing in companies which are well governed and with positive environmental and social impact. The issuer of such securities or instruments are evaluated based on the sustainability considerations as disclosed in the section "ESG Assessment Methodology" and their disclosure of information pertaining to environmental and social impact. As an SRI qualified Fund, the investments of the Fund are subject to the integration of the sustainability considerations. At least two thirds (2/3) of the Fund's NAV are maintained in securities or instruments that are subjected to sustainability considerations. A greater proportion of the Fund's holdings would be securities or instruments with better ESG scores. The Manager will ensure that at least two thirds (2/3) of the investments of the Fund are in line with

		the sustainability principles adopted and the overall impact of such investments of the Fund is not inconsistent with any other sustainability principles by continuously monitoring and rebalancing the investments throughout the lifecycle of the Fund. The term “any other sustainability principles” refers to additional sustainability frameworks, standards, or guidelines that the Manager may adopt or align with, in addition to the Fund’s core sustainability principles. These may include, but are not limited to, the United Nations Principles for Responsible Investment (UN PRI), the United Nations Sustainable Development Goals (SDGs), and relevant sustainability frameworks or taxonomies introduced by regulatory authorities such as the Securities Commission Malaysia’s SRI Taxonomy. This approach allows the Manager flexibility to align the Fund’s investment process with evolving sustainability practices and regulatory developments, while remaining consistent with the Fund’s overall sustainability objectives. If the Fund’s investment becomes inconsistent with its investment strategies or the Fund breaches the two thirds (2/3) asset allocation threshold in investments that are subjected to sustainability considerations, the Manager will dispose and replace the investment(s) within three (3) months. However, any breach as a result of: - (i) any appreciation or depreciation in value of the Fund’s investments; or (ii) repurchase of Units or payment made out of the Fund, need not be reported to the SC and must be rectified as soon as practical within three (3) months from the date of the breach. The three-month period

		may be extended if it is in the best interest of Unit Holders and Trustee's consent is obtained. Such extension must be subject to at least a monthly review by the Trustee. The Manager will as soon as practicable notify SC of any changes to the Fund immediately at its best efforts to provide, without prior request, the relevant information which may include but is not limited to any event that could impact the Fund's ability to comply with the Guidelines on Sustainable and Responsible Investment Funds to the SC. When the Fund is found to be no longer in compliance with the Guidelines on Sustainable and Responsible Investment Funds, the SC may revoke the Fund's SRI qualification.
Inserted "ESG Assessment Methodology" section	Not Applicable	All issuers or depository financial institutions of the permitted investments undergo ESG evaluation by the Manager using information obtained publicly and through engagement with sovereign or corporate issuers and depository financial institutions, which we may supplement with data and references of external parties including credit rating agencies, research companies, as well as service and index providers. The Manager will assess the ESG factors of each sovereign or corporate issuer and depository financial institution before proposing the ESG scores to an internal committee. The committee has the discretion to exclude a recommendation or request for further information before considering exclusion. ESG scores are reviewed by an internal committee. On a case-by-case basis, the committee will restrict investment in a company where the committee has unmitigated concerns on any one of the company's E, S or G aspects. The ESG evaluation is reviewed annually to ensure its continued relevance. The general considerations of ESG factors considered under each of the

		ESG pillars may include: • Environmental (E) – climate change, energy sustainability, natural resources, pollution and waste, and environmental opportunities; • Social (S) – human capital, human rights, product liability, consumer protection, stakeholder opposition, social opportunities; and • Governance (G) – corporate governance, management structure and behaviour, employee relations and executive compensation. For instruments issued by sovereign issuers, the Manager will evaluate the sovereign issuers more specifically on the sustainability considerations as below and subjected to applicability: <u>Environment</u> 1. Environmental vulnerability – The risk of disruption to a country's economic output caused by degree of exposure to natural disasters or adverse weather conditions. 2. Environmental readiness – Considerations being given to country's available resources and institutional capability to leverage private and public sector investment for adaptive action to climate change and other natural disasters. There is also consideration of existing efforts to transition towards carbon neutrality, climate change adaptation strategies, resilience records. <u>Social</u> 1. Human development – Considerations are given to a country's Human Development Index adjusted by inequality factor, as well as Gender Inequality Index by the United Nations Development Programme ("UNDP"). 2. Safety - The population safety aspect supplements the Human Development Index assessment. Violent deaths (homicides) per

		100,000 people is used as a proxy for overall violence of a country as recognized by United Nations Office on Drugs and Crime (UNODC). <u>Governance</u> The Manager assesses the standard Sovereign Credit factors for governance. 1. Institutional strength – Includes assessment of a government institutions and policymaking relating to delivery sustainable public finances, promotion balanced economic growth, and responding to economic or political shocks. 2. Monetary policy effectiveness – Reflecting monetary policy credibility, including the independence of the central bank, its policymaking tools and effectiveness, track record on price stability, and role as a lender of last resort. The sustainability considerations of ESG factors considered for sovereign issuers are updated and reviewed annually. These ESG factors are based on multi-national sources gathered from the United Nations Development Programme (UNDP), United Nations Office on Drugs and Crime (UNODC), World Bank, International Monetary Fund, Eurostat and United Nations Statistics Division and publicly available global rankings and the data is verified against government data. The Manager also continuously seeks verification on the relevant data from government institution websites, public speeches, public announcements, newsflash, central banks and/or national statistics agency of the respective sovereigns in our investment universe. Where available and necessary, the Manager will seek in-person engagement with representatives of the government institutions for details and data. As for instruments issued by corporate issuers or depository financial institutions, the Manager will evaluate

		the corporate issuers or depository financial institutions more specifically on the sustainability considerations below and subjected to applicability: • Environment 1. Climate change and biodiversity – Do the activities of the company impact the climate and natural habitats which in turn affects biodiversity? How does the company manage transition risks and progress towards environmental targets? 2. Pollution and natural resources – Do the activities of the company impact pollution such as water, air soil, noise pollution etc.? Does the company have good track record on energy consumption and use natural resources efficiently? 3. Waste management – What is the company's waste related policies such as disposal of chemical waste. • Social 1. Responsibility towards customers – How does the company treat its customers and fulfill its social obligations? Has the company been involved in misrepresentation or mis-selling of products? Are the customers' data well protected? 2. Labour standards – Does the company treat its workforce fairly? Do the working conditions meet the standards of the labour department? Is there diversity in the workforce? Does the company have an inclusion culture? Are there any human rights violation issues? 3. Health and safety – Does the company provide a safe and healthy environment to work in? What is the trend in worksite incidents/ fatalities? 4. Community engagements – Does the company engage with the community they serve or operate in, especially in providing employments and corporate

		social responsibility initiatives to give back to the community? 5. Supply chain management – is the company aware of the social environment of its suppliers, such as forced labour and human rights violation? 6. Employee relations and diversity – How is the company regarded by its employees? Is the company recognized as one of the top employers in its industry? Does the company have policies to protect employee rights? What is the gender/ ethnic breakdown and trends towards labour diversity? • Governance 1. Corporate governance – Does the company have good corporate governance structure in place? What is the proportion of independent directors? How transparent is the company in its reporting to shareholders? 2. Risk management – How compliant is the company with regards to regulatory requirements? Has there been any regulatory breach? 3. Corruption/Mismanagement – Are there policies in place against bribery and corruption? Is the company or its management involved in any scandals relating to issues such as bribery or misappropriation of funds? What are the rectification and mitigation measures to address these scandals? The assessment of each sovereign or corporate issuer and depository financial institution's performance is not absolute but is explicitly intended to be relative to the standards and performance of its peers. The weightage of each of the E, S and G pillars could differ across sectors and companies, to reflect their relative importance and absolute impact on the factors under the ESG pillars consideration. For example, "E" would be given a higher weight for an oil and

		gas company with no exposure to renewables business compared with a telecommunications provider. However, “G” is given a higher weight across all sectors to reflect our emphasis on corporate governance. The ESG assessment methodology rates each sovereign or corporate issuer and depository financial institution of the investment with an ESG score, on a scale of 1 to 5, with 1 as the lowest and 5 as the highest. A higher ESG score is assigned to a sovereign issuer, corporate issuer or depository financial institution with stronger ESG characteristics and vice versa for a sovereign issuer, corporate issuer or depository financial institution with weaker ESG characteristics. A sovereign issuer, corporate issuer or depository financial institution with a neutral ESG will be assigned an ESG score of 3. Accordingly, the Manager reviews the ESG scores and data points at least annually to ensure its continued relevance. The Manager also constantly monitors relevant news that may affect the ESG scores and re-assigns the ESG scores accordingly. The ESG evaluation is reviewed and updated periodically, i.e., at least once a year, or as and when required. Such reviews may be prompted by material events or relevant news developments. The Fund would maintain at least two thirds (2/3) of the portfolio in investments with ESG scores of at least 3.

The insertion of “ Sustainability and Responsible Investment and Impact Risk ” and “ Greenwashing Risk ” to the SPECIFIC RISKS ASSOCIATED WITH AMINCOME VALUE section	Not Applicable.	Sustainability and Responsible Investment and Impact Risk As the Fund has an intention to generate positive sustainable and responsible impact alongside a financial return (“impact”), the investor must be able to accept temporary capital losses due to the potentially restricted number of companies that the Fund can invest in due to those companies which may not meet the sustainability considerations requirement and, consequently, should view investment in the Fund as a long-term investment. The Fund may seek to exclude holdings deemed inconsistent with the sustainability considerations. As a result, the investments of the Fund will be more limited than other funds that do not apply sustainability considerations. The Fund may be precluded from purchasing, or required to sell, certain investments that are inconsistent with its investment policy and sustainability considerations which might otherwise be advantageous to hold. The incorporation of sustainability considerations could result in performance that is better or worse than the performance of the other funds depending on the performance of the excluded investments. The Manager will oversee the Fund by mitigating financial risk through measures such as minimum credit rating thresholds, while seeking to

		enhance potential returns through securities selection, curve positioning, active duration management, and market condition analysis. Additionally, the Manager will employ models to analyze and compare expected returns against assumed risks. In addition, to mitigate sustainability and impact risks, the Fund integrates an ESG Assessment Methodology into its investment process. This evaluates potential investments across environmental, social, and governance pillars to identify issuers with stronger sustainability profiles and lower long-term risk exposure. While this may narrow the investment universe, it supports the Fund's alignment with responsible investment principles under the SRI guidelines. The Manager will also focus on securities or instruments that would deliver better returns and will consider obligations with more favourable or improving credit or industry outlook that provides the potential for capital appreciation. Greenwashing Risk Greenwashing is defined as making false, misleading or unsubstantiated claims in relation to ESG credential of an investment product. The Fund may inadvertently invest into such products, without prior knowledge of the fraudulent claims. As greenwashing could result in reputational risk, regulatory fines, and/or withdrawal of the products, there could be a negative impact on the value of the Fund. In mitigating the greenwashing risk, there are governance and guidelines in place for assessing the sustainability of the sovereign or corporate issuer and depository financial institution. The Manager's firmwide sustainability matters are governed by the firm's sustainability framework, approved by the Board, while its investment approach is governed by the firm's sustainable investment guidelines,

		approved by the committee undertaking an oversight function of the Fund. These frameworks set out defined criteria and a structured process to assess the sustainability performance of investee companies. The ESG score prescribed to the sovereign or corporate issuer and depository financial institution are reviewed and approved by appropriate approving authorities internally, and updated periodically, i.e. at least once a year.
