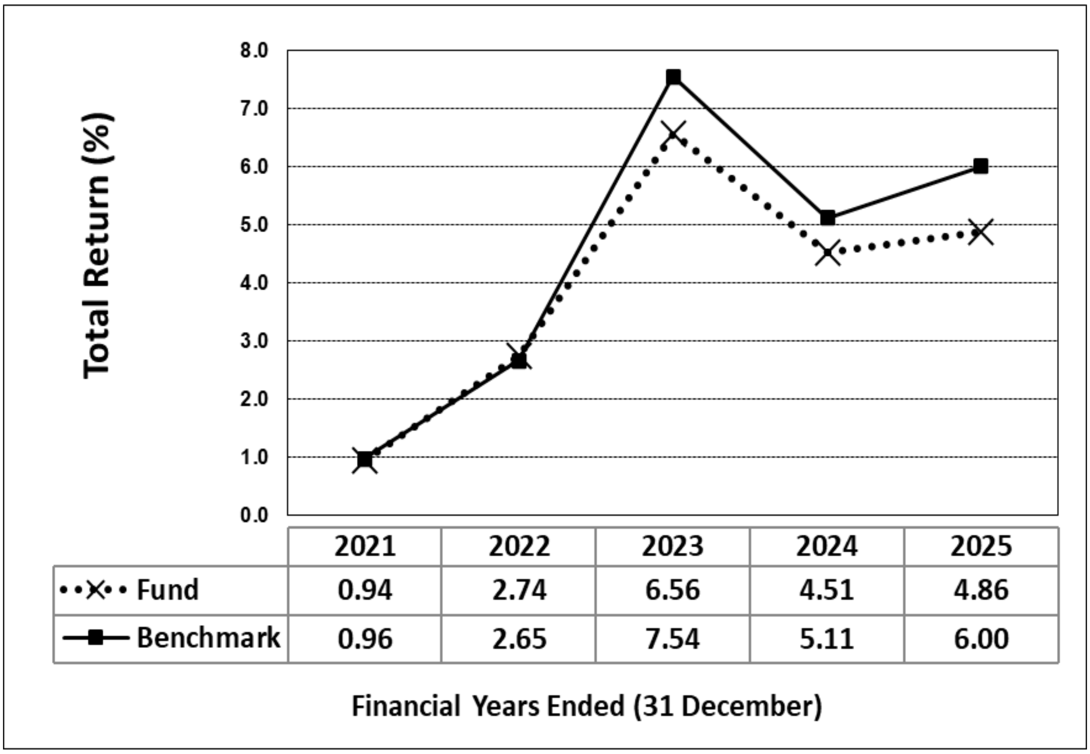
The Fund performance is calculated based on the net asset value per unit of the Fund. Average total return of the Fund and its benchmark for a period is computed based on the absolute return for that period annualised over one year.

Note: Past performance is not necessarily indicative of future performance and that unit prices and investment returns may go down, as well as up.

Fund Performance	For the financial period under review, the Fund registered a return of 0.73% comprising of negative 0.33% capital and 1.06% income distributions. Thus, the Fund's return of 0.73% has underperformed the benchmark's return of 0.85% by 0.12%. As compared with the financial period ended 31 March 2026, the net asset value ("NAV") per unit of the Fund decreased by 0.32% from RM1.0517 to RM1.0483, while units in circulation decreased by 1.31% from 1,193,059,470 units to 1,177,450,950 units.

The following line chart shows the comparison between the annual performances of AmInstitutional Income Bond SRI and its benchmark for the financial years ended 31 December.



Note: Past performance is not necessarily indicative of future performance and that unit prices and investment returns may go down, as well as up.

Strategies and Policies Employed

The Fund seeks to achieve its investment objective by investing up to 100% of the NAV in fixed income instruments i.e. corporate bonds or sukuk and/or government securities and any other securities guaranteed by the Malaysian government, Bank Negara Malaysia (BNM) or other related government agencies with a minimum credit rating of:

- RM-denominated fixed income instruments: A3 or its equivalent as rated by a local rating agency; and
- Non-RM-denominated fixed income instruments: BBB- or its equivalent as rated by a global rating agency.

Market Review

In April 2026, the Malaysian bond market strengthened, with Malaysian Government Securities (MGS) yields declining by 4-8bps across the curve on the back of supportive domestic fundamentals. Bank Negara Malaysia (BNM) maintained the Overnight Policy Rate (OPR) at 2.75%, while subdued inflation and stronger-than-expected 1Q2026 Gross Domestic Product (GDP) growth supported investor confidence. Demand for sovereign bond and sukuk auctions was robust, with bid-to-cover (BTC) ratios ranging between 2.03x and 2.92x. Foreign sentiment also improved significantly, with RM3.8 billion of net inflows into government bonds in March, lifting foreign ownership of MGS and Malaysian Government Investment Issues (MGII) to 21.6%.

However, MGS yield curve bear-flattened in May as yields rose mainly in the 3–7-year segment, while longer-dated bonds were largely unchanged. Although the month began positively following BNM’s decision to keep rates unchanged and easing Gulf tensions, sentiment weakened later as persistent geopolitical risks and higher energy prices reignited inflation concerns, leading to a broader global bond sell-off. Despite the challenging backdrop, sovereign bond and sukuk auctions remained well supported, with BTC ratios ranging between 2.28x and 2.87x. Foreign holdings of Ringgit bonds continued to rise, increasing by a further RM3.8 billion in April, driven primarily by inflows into private debt securities.

In June 2026, yields are higher across tenors amid a weaker external rates environment and continued geopolitical uncertainty. Sentiment softened during the month due to rising energy prices and higher global yields. Nevertheless, investor demand for primary issuances remained strong, with four sovereign bond and sukuk auctions recording BTC ratios between 1.93x and 3.41x. Foreign holdings of Ringgit bonds declined by RM4.3 billion in May, reflecting profit-taking and weaker regional risk appetite. Meanwhile, corporate bond trading activity rebounded by 7.6% month-on-month to RM18.7 billion, supported by improved secondary market valuations and post-holiday trading activity.

	The Malaysian bond market remained notably resilient in the second quarter of 2026, successfully navigating a backdrop of heightened geopolitical uncertainty and evolving global interest rate expectations. Investor demand for sovereign bond and sukuk issuances remained consistently robust, underscoring confidence in Malaysia's sound macroeconomic fundamentals, credible policy framework, and well-established domestic institutional investor base. The market's ability to absorb supply efficiently while maintaining orderly trading conditions reflects the depth and stability of Malaysia's fixed income landscape, reinforcing its attractiveness within the regional investment universe.
Market Outlook	Malaysia's macroeconomic backdrop remains broadly supportive heading into July 2026, although market conditions are becoming increasingly nuanced amid evolving global and domestic developments. Domestic growth is expected to remain resilient, underpinned by steady private consumption, ongoing investment activity, and continued implementation of government development initiatives. However, external demand may face headwinds from a slower and less synchronised global growth environment, potentially tempering export momentum in the coming quarters. Inflation remains generally contained, supported by easing cost pressures and stable domestic demand conditions. Nevertheless, lingering core inflation risks warrant continued monitoring. Against this backdrop, Bank Negara Malaysia (BNM) is expected to maintain a data-dependent approach, balancing the need to support growth while preserving price stability. For the bond market, global interest rate expectations remain the key driver of local sentiments. The pace and extent of policy tightening by major developed market central banks, alongside evolving geopolitical and trade-related developments, are likely to influence capital flows, investor risk appetite and local yield movements. While Malaysian Government Securities (MGS) continue to benefit from supportive domestic liquidity and stable fundamentals, yields are expected to remain range-bound with periodic volatility arising from external developments and primary supply dynamics.
A statement that the fund has complied with Guidelines on Sustainable and Responsible Investment Funds during the reporting period	For the financial period under review, the Fund complied with the requirements of the Guidelines on Sustainable and Responsible Investment Funds ("SRI").
Descriptions on sustainability considerations that have been adopted in the policies and strategies employed	As a SRI qualified fund, the investments of the Fund are subjected to the integration of the sustainability considerations. Please refer to "**Strategies and Policies Employed**" section in this report for further information on the Fund's sustainability considerations.

Descriptions of the SRI Fund's policies and strategies achieved during the reporting period which must include, but are not limited to the following (a-g) :-

(a) A review on sustainability considerations of the SRI Fund's portfolio	For the financial period under review, the Fund incorporated sustainability considerations in securities or instruments selection (including instruments issued under their respective green, social and sustainability ("GSS") bond framework), by investing in companies which are well governed and with positive environmental and social impact. The issuer of such securities or instruments are evaluated based on the sustainability considerations as disclosed in the section "ESG Assessment Methodology" and their disclosure of information pertaining to environmental and social impact.
(b) The proportion of underlying investments that are consistent with the SRI Fund's policies and strategies	For the financial period under review, the Fund invested at least two-thirds (2/3) of the NAV of the Fund in securities or instruments (excluding Malaysian government securities, cash, deposits and money market instruments) that are in line with the sustainability considerations adopted by the Fund.
(c) Where the SRI Fund's underlying investments are inconsistent with its policies and strategies, descriptions on steps undertaken to rectify the inconsistency	Not applicable as the Fund's underlying investments are consistent with its policies and strategies. That said, if the Fund's investments become inconsistent with its investment strategies or the Fund breaches the two thirds (2/3) asset allocation threshold in investments that are subjected to sustainability considerations, the Fund Manager will dispose and/or replace the investment(s) within seven (7) business days from the date of the breach.
(d) Actions taken in achieving the SRI Fund's policies and strategies	The Fund Manager continuously monitor and if required, rebalance the investments to ensure that at least two-thirds (2/3) of the NAV of the Fund are maintained in securities or instruments (excluding Malaysian government securities, cash, deposits and money market instruments) that are in line with the sustainability considerations adopted by the Fund.
(e) A comparison of the SRI Fund's performance against the designated reference benchmark (if available)	Not applicable since the Fund does not have a designated SRI benchmark.
(f) Descriptions on sustainability risk considerations and the inclusion of such risks in	Sustainability and Responsible Investment and Impact Risk As the Fund has an intention to generate positive sustainable and responsible impact alongside a financial return ("impact"), the investor must be able to accept temporary capital losses due to the potentially restricted number of companies that the Fund can invest in due to those companies which may not meet the sustainability considerations requirement and, consequently, should view investment in the Fund as a long-term investment.

the SRI Fund's investment decision making process	The Fund may seek to exclude holdings deemed inconsistent with the sustainability considerations. As a result, the investments of the Fund will be more limited than other funds that do not apply sustainability considerations. The Fund may be precluded from purchasing, or required to sell, certain investments that are inconsistent with its investment policy and sustainability considerations which might otherwise be advantageous to hold. The incorporation of sustainability considerations could result in performance that is better or worse than the performance of the other funds depending on the performance of the excluded investments and the investments included in place of such excluded investments. This risk is mitigated via investment strategy of the Fund such as by imposing minimum credit rating, active tactical duration management and by analyzing general market conditions. In addition, the Manager will use models that analyze and compare expected returns and assumed risk. The Manager will also focus on securities or instruments that would deliver better returns and will consider obligations with more favourable or improving credit or industry outlook that provides the potential for capital appreciation. Greenwashing Risk Greenwashing is defined as making false, misleading or unsubstantiated claims in relation to ESG credential of an investment product. The Fund may inadvertently invest into such products, without prior knowledge of the fraudulent claims. As greenwashing could result in reputational risk, regulatory fines, and/or withdrawal of the products, there could be a negative impact on the value of the Fund. In mitigating the greenwashing risk, there are governance and guidelines in place for assessing the sustainability of the sovereign or corporate issuer and depository financial institution. The ESG score prescribed to the sovereign or corporate issuer and depository financial institution are reviewed and approved by appropriate approving authorities internally, and updated periodically, i.e. at least once a year.
(g) Any other information, considered necessary and relevant by the issuer	No additional information deemed necessary to be disclosed.
Where the SRI Fund has provided previous periodic reviews, a comparison between the current and at least the previous reporting period	For the current and previous reporting period, the Fund complied with the requirements of the Guidelines on Sustainable and Responsible Investment Funds ("SRI Guidelines") by investing at least two-thirds (2/3) of its NAV in securities or instruments that align with the sustainability considerations adopted by the Fund.
