

Fund Overview
Investment Objective

AmlIslamic Growth (the "Fund") aims to provide long-term*** capital growth mainly through investments in securities with superior growth potential*, which conforms to principles of Shariah.

The Fund is suitable for investors seeking:

- seeking diversified portfolio of Islamic equities with emphasis on growth;
- seeking potential capital growth from Islamic investments rather than regular income** distribution; and
- with long-term*** investment goal.

Notes: *Superior growth potential in this context refers to earnings growth higher than the market average.

**The income distribution (if any) could be in the form of units or cash.

***Long-term refers to a period of at least five (5) years.

Any material change to the investment objective of the Fund would require Unit Holders' approval.

The returns presented are net of all relevant fees, charges, and costs associated with the unit trust investment. These may include, but are not limited to, management fees, trustee fees, and other applicable charges. Over time, such fees and charges can materially reduce the overall returns on your investment.

It is important to note that the sales charge is deducted upfront and directly reduces the amount of the initial investment that is allocated to the fund, which in turn can have the effect of lowering returns to investors in the long run. These costs may be deducted from your investment amount, from the returns generated, or directly from the Fund's assets, and are reflected in the unit price (NAV per unit). This includes expenses related to the marketing and distribution of the Fund. Additionally, all fees and charges payable to the Manager and the Trustee are subject to applicable taxes and/or duties, which may vary from time to time as imposed by the government.

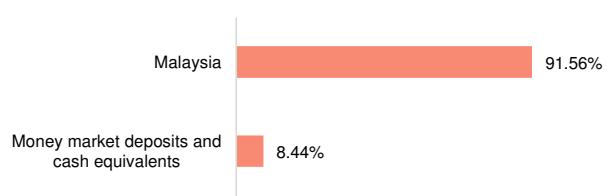

Given the impact these costs can have on your investment returns, investors are strongly advised to read and understand the contents of the Fund's prospectus and consider the cumulative impact of these costs before making any investment decision.

Past performance is not necessarily indicative of future performance and that unit prices and investment returns may go down, as well up.
