Strategies and Policies Employed

For the financial period under review, the Fund invested primarily in Malaysian equities. Liquid assets are strategically used for defensive measures in the short-term, if the Manager views market risk to be high.

The Manager adopted a top-down investment approach followed by both quantitative and qualitative screens for stock selection. The Fund will actively balance between 'growth' and 'defensive' stocks depending on the Manager's view of the market cycle. The asset allocation and stock selection will be reviewed periodically depending on the country's economic and stock market outlook.

The company has soft commission arrangement with a total of 12 brokers, who execute trades for the Fund and other funds or investments managed by the company. The soft commission received would be in the form of research services, systems and services relating to performance measurement of portfolios and/or subscription fees for fund’s benchmark indices. All of these assist in the investment decision making process which are of demonstrable benefit to unitholders of the Fund and other funds or investments managed by the company. Soft commissions received were for the benefit of the Fund and there was no churning of trades.											
Market Review	The fourth quarter of 2025 was the third consecutive quarter of gains for the KLCI, returning 4.7%. For the full year, Malaysia’s leading index gained just 2.3% due to the - 7.8% decline in 1Q2025. As a result, the best performing sector in 4Q2025 were the Financials (+8%), on the back of the positive Ringgit carry, as the MYR closed 2025 as Asia’s best performing currency. In United States Dollar (USD)-terms, the KLCI far outperformed, gaining some 11.5%. Despite Financials leading the index higher in 4Q2025, the top index gainers were both thematic in nature – 99 Speedmart (+39% 4Q2025), Press Metal (+20.5% 4Q2025), and Nestle Malaysia (+18.5% 4Q2025). 99 Speedmart and Nestle continue to benefit from the government’s SARA programme, while Press Metal has been a beneficiary of the global commodity rally, which also made Plantations the best performing sector in 2025 (+8.8% FY2025). 99 Speedmart and Press Metal were also the best performer index stocks for the year, gaining 54.3% and 45.3% respectively in FY2025. Malaysia saw a gain in 1Q2026, albeit off highs given the war-time volatility in March. For the first quarter of the year, Malaysia’s FBMKLCI and FBM100 indexes gained											

	0.6%/0.6% respectively. The best performing sectors in 1Q2026 were largely commodity driven, as investors hedged into Middle East conflict thematics. Plantations (+7.9% 1Q2026) were the best performing sector as Palm Oil – Gas Oil (POGO) spreads widened, and Crude Palm Oil (CPO) ASPs tracked crude oil prices higher. Industrial Production (5.4% 1Q2026) were led higher by Petronas Chemicals (+67.2% 1Q2026) and Press Metal (+12.4% 1Q2026) as the war damaged energy and aluminium production in the Middle East. Despite oil being the best performing commodity in March, Energy was just the third best performer in Malaysia, gaining 3.9% in the quarter, a reflection of Malaysia's oil & gas space having mostly consolidated into small-mid caps in recent years. In April, the KLCI gained 1.9% Month-over-Month (MoM), bringing year to date performance to 2.5%. Malaysia's mid-cap and small-cap indices gained 7.2% and 6.6% MoM respectively. Technology and Construction were the best performing sectors, gaining 22.9% and 11.6% MoM respectively. On the other hand, Finance and Plantation were the worst performing sectors, with a loss of 0.7% and 0.5% respectively. The top three best performers in KLCI component stocks were YTL Power (+27.3%), YTL Corp (+20.7%) and Gamuda (+18.5%), while the worst performing stocks were Petronas Dagangan (-7.6%), AMMB (-6.7%) and Sunway Healthcare (-5.5%).
Market Outlook	The recently concluded 1Q2026 earnings reporting season saw a slight pick-up in earnings misses. The weakness reflects the combined headwinds of volatile market conditions, higher costs and weaker sales stemming from the United States (US)-Iran war. Guidance by management teams during analyst briefings were mixed, with many corporations adopting a more cautious stance. Any correction on fundamentally-sound stocks presents a good opportunity to accumulate for long-term positioning.

3.3 Functional and presentation currency

Functional currency is the currency of the primary economic environment in which the Fund operates that most faithfully represents the economic effects of the underlying transactions. The functional currency of the Fund is Ringgit Malaysia ("RM") which reflects the currency in which the Fund competes for funds, issues and redeems units. The Fund has also adopted RM as its presentation currency.

3.4 Foreign currency transactions

Transactions in currencies other than the Fund's functional currency (foreign currencies) are recorded in the functional currency using exchange rates prevailing at the transaction dates. At each reporting date, foreign currency monetary items are translated into RM at exchange rates ruling at the reporting date. All exchange gains or losses are recognised in profit or loss.

3.5 Statement of cash flows

The Fund adopts the direct method in the preparation of the statement of cash flows.

Cash and cash equivalents are short-term, highly liquid investments that are readily convertible to cash with insignificant risk of changes in value.

3. MATERIAL ACCOUNTING POLICY INFORMATION (CONT'D.)

3.6 Distribution

Distribution is at the discretion of the Manager. A distribution to the Fund's unit holders is accounted for as a deduction from retained earnings and realised income. Realised income is the income earned from dividend/distribution income, interest income and net gain on disposal of investments after deducting expenses and taxation. A proposed distribution is recognised as a liability in the period in which it is approved. Distribution is either reinvested or paid in cash to the unit holders on the distribution payment date. Reinvestment of units is based on the NAV per unit on the distribution payment date, which is also the time of creation.

3.7 Unit holders' capital

The unit holders' capital of the Fund meets the definition of puttable instruments and is classified as equity instruments as it meets all criteria for such classification under MFRS 132 *Financial Instruments: Presentation* ("MFRS 132").

3.8 Financial instruments – initial recognition and measurement

(i) Initial recognition

Financial assets and financial liabilities are recognised when the Fund becomes a party to the contractual provisions of the instrument. Regular way purchases and sales of financial assets are recognised using trade date accounting or settlement date accounting. The method used is applied consistently for all purchases and sales of financial assets that belong to the same category of financial assets.

(ii) Initial measurement

All financial assets are recognised initially at fair value, in the case of financial assets not recorded at FVTPL, transaction costs that are attributable to the acquisition of the financial asset. All financial liabilities are recognised initially at fair value and, in the case of financial liabilities not recorded at FVTPL, net of directly attributable transaction costs.

(iii) "Day 1" profit or loss

At initial measurement, if the transaction price differs from the fair value, the Fund immediately recognises the difference between the transaction price and fair value (a "Day 1" profit or loss) in profit or loss provided that fair value is evidenced by a quoted price in an active market for an identical asset or liability (i.e. Level 1 input) or based on a valuation technique that uses only data from observable markets. In all other cases, the difference between the transaction price and model value is recognised in profit or loss on a systematic and rational basis that reflects the nature of the instrument over its tenure.

3.9 Financial assets

Classification and measurement

The classification of financial assets depends on the Fund's business model of managing the financial assets in order to generate cash flows ("business model test") and the contractual cash flow characteristics of the financial instruments ("SPPI test"). The business model test determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both and the assessment is performed on a portfolio basis. The SPPI test determines whether the contractual cash flows are solely for payments of principal and interest and the assessment is performed on a financial instrument basis.

The Fund may classify its financial assets under the following categories:

Financial assets at amortised cost

A financial asset is measured at amortised cost if it is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding. Financial assets include in this category are deposits with licensed financial institutions, cash at banks, amount due from Manager, amount due from Target Fund Manager, amount due from brokers/financial institutions, dividend/distribution receivables and other receivables.

Financial assets at fair value through other comprehensive income ("FVOCI")

A financial asset is measured at FVOCI if its business model is both to hold the asset to collect contractual cash flows and to sell the financial assets. In addition, the contractual terms of the financial assets give rise on specified dates to cash flows that are solely payments of principal and interest on the outstanding principal.

These investments are initially recorded at fair value and transaction costs are expensed in the profit or loss. Subsequent to initial recognition, these investments are remeasured at fair value. All fair value adjustments are initially recognised through OCI. Debt instruments at FVOCI are subject to impairment assessment.

3. MATERIAL ACCOUNTING POLICY INFORMATION (CONT'D.)

3.9 Financial assets (cont'd.)

Classification and measurement (cont'd.)

The Fund may classify its financial assets under the following categories: (cont'd.)

Financial assets at FVTPL

Any financial assets that are not measured at amortised cost or FVOCI are measured at FVTPL. Subsequent to initial recognition, financial assets at FVTPL are measured at fair value. Changes in the fair value of those financial instruments are recorded in "Net gain or loss on financial assets at FVTPL". Dividend/Distribution revenue and interest earned elements of such instruments are recorded separately in "Dividend/Distribution income" and "Interest income" respectively. Exchange differences on financial assets at FVTPL are not recognised separately in profit or loss but are included in net gain or net loss on changes in fair value of financial assets at FVTPL.

Instruments that qualify for amortised cost or FVOCI may be irrevocably designated as FVTPL, if doing so eliminates or significantly reduces a measurement or recognition inconsistency. Equity instruments are normally measured at FVTPL, nevertheless, the Fund is allowed to irrevocably designate equity instruments that are not held for trading as FVOCI, with no subsequent reclassification of gains or losses to profit or loss.

The Fund subsequently measures its investments at FVTPL. Dividend/Distribution earned whilst holding the investments are recognised in profit or loss when the right to receive the payment has been established. Gains and losses on the investments, realised and unrealised, are included in profit or loss.

3.10 Financial liabilities – classification and subsequent measurement

Financial liabilities issued by the Fund are classified as financial liabilities at amortised cost, where the substance of the contractual arrangement results in the Fund having an obligation either to deliver cash or another financial asset to the holders. After initial measurement, financial liabilities are subsequently measured at amortised cost using the effective interest method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL PERIOD FROM 1 NOVEMBER 2025 TO 30 APRIL 2026**

3. MATERIAL ACCOUNTING POLICY INFORMATION (CONT'D.)

3.11 Derecognition of financial instruments

(i) Derecognition of financial asset

A financial asset (or, where applicable a part of a financial asset or part of a group of similar financial assets) is derecognised when:

- the rights to receive cash flows from the asset have expired, or
- the Fund has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a “pass-through” arrangement; and either:
 - the Fund has transferred substantially all the risks and rewards of the asset, or
 - the Fund has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

For investments classified as FVOCI - debt instruments, the cumulative fair value change recognised in OCI is recycled to profit or loss.

(ii) Derecognition of financial liability

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expired. Gains and losses are recognised in profit or loss when the liabilities are recognised, and through the amortisation process.

3.12 Financial instruments – expected credit losses (“ECL”)

The Fund assesses the ECL associated with its financial assets at amortised cost using simplified approach. Therefore, the Fund does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECL at each reporting date. The ECL in respect of financial assets at amortised cost, if any, is recognised in profit or loss.

Financial assets together with the associated allowance are written off when it has exhausted all practical recovery efforts and there is no realistic prospect of future recovery. The Fund may also write-off financial assets that are still subject to enforcement activity when there is no reasonable expectation of full recovery. If a write-off is later recovered, the recovery is credited to profit or loss.

**NOTES TO THE FINANCIAL STATEMENTS
FOR THE FINANCIAL PERIOD FROM 1 NOVEMBER 2025 TO 30 APRIL 2026**

3. MATERIAL ACCOUNTING POLICY INFORMATION (CONT'D.)

3.13 Determination of fair value

For the investments in local quoted equity securities and Collective Investment Schemes ("CIS"), fair value is determined based on the closing price quoted on Bursa Malaysia Berhad. Purchased cost is the quoted price that the Fund paid when buying its investments. The difference between the purchased cost and fair value is treated as unrealised gain or loss and is recognised in profit or loss.

3.14 Classification of realised and unrealised gains and losses

Unrealised gains and losses comprise changes in the fair value of financial instruments for the period and from reversal of prior period's unrealised gains and losses for financial instruments which were realised (i.e. sold, redeemed or matured) during the reporting period.

Realised gains and losses on disposals of financial instruments classified at FVTPL are calculated using the weighted average method. They represent the difference between an instrument's initial carrying amount and disposal amount.

3.15 Significant accounting estimates and judgments

The preparation of the Fund's financial statements requires the Manager to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities and the disclosure of contingent liabilities at the reporting date. However, uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability in the future.

The Fund classifies its investments as financial assets at FVTPL as the Fund may sell its investments in the short-term for profit-taking or to meet unit holders' cancellation of units.

No major judgments have been made by the Manager in applying the Fund's accounting policies. There are no key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial period.
