Fund Factsheet September 2026

AmSustainable Series - Global Lower Carbon Equity Fund

Fund Overview

Investment Objective

AmSustainable Series - Global Lower Carbon Equity Fund (the "Fund") seeks to provide long-term capital growth.

The Fund is suitable for Sophisticated Investors[1] seeking:

- potential capital appreciation over a long-term* investment horizon; and
- participation in the global equity market in companies that have a lower carbon intensity

Note: *Long-term refers to a period of at least five (5) years.
Any material change to the investment objective of the Fund would require Unit Holders' approval.
This material is not intended for non-sophisticated investors. [1]Please refer to the definition of "Sophisticated Investor" in the Information Memorandum.

Fund Performance (as at 31 August 2026)

Cumulative performance over the period (%)

Source Fund Return: Novagni Analytics and Advisory Sdn. Bhd.
Note : There is no record of the Fund's performance for five (5) years as the Fund was launched in less than five (5) years.

The returns presented are net of all relevant fees, charges, and costs associated with the wholesale investment. These may include, but are not limited to, management fees, trustee fees, and other applicable charges. Over time, such fees and charges can materially reduce the overall returns on your investment.

It is important to note that the sales charge is deducted upfront and directly reduces the amount of the initial investment that is allocated to the fund, which in turn can have the effect of lowering returns to investors in the long run. These costs may be deducted from your investment amount, from the returns generated, or directly from the Fund's assets, and are reflected in the unit price (NAV per unit). This includes expenses related to the marketing and distribution of the Fund. Additionally, all fees and charges payable to the Manager and the Trustee are subject to applicable taxes and/or duties, which may vary from time to time as imposed by the government.

Given the impact these costs can have on your investment returns, investors are strongly advised to read and understand the contents of the Fund's information memorandum and consider the cumulative impact of these costs before making any investment decision.

Past performance is not necessarily indicative of future performance and that unit prices and investment returns may go down, as well up.

Target Fund Manager's Commentary (as at 31 August 2026)

Global equities regained momentum in August, supported by resilient activity data and a healthy earnings backdrop. Technology leadership re-emerged as semiconductor sentiment improved after July's pullback, while value also participated, signalling broader risk appetite. US equities advanced as strong earnings—again led by AI-linked capex and profits—supported sentiment. Mega-cap performance was more mixed beneath the surface, but technology momentum improved versus July. The equal-weighted index lagged the cap-weighted benchmark, consistent with leadership still concentrated at the top end of the market. Small caps outperformed on firmer global growth signals and supportive risk appetite. European equities rose, helped by the renewed bid for growth-style exposures and improved global risk sentiment. However, higher yields across the region weighed on rate-sensitive segments, as markets leaned towards further ECB tightening. Energy price volatility remained a swing factor for margins and inflation expectations, while commodity strength supported materials-linked areas. Overall, Europe participated in the rally but lagged the strongest regions. UK equities were supported by their diversified, more value-tilted sector mix and relatively lower concentration in mega-cap technology. Strength in materials and energy helped as commodities were broadly higher, while financials remained sensitive to the evolving rates outlook.

In August, as of month end the Target Fund underperformed its market cap weighted index. On a portfolio level, our exposures to Quality and Low Carbon contributed to performance, while our exposures to Value, Low Risk, Industry Momentum and Size weighed on performance.

On an industry basis, our overweight allocations to Materials and Technology Hardware & Equipment coupled with our underweight exposure to Consumer Staples Distribution & Retail contributed to performance. Conversely, our underweight exposure to Software & Services coupled with our overweight allocations to Insurance and Capital Goods weighed on performance.

On a country basis, our overweight allocations to Austria and Sweden coupled with our underweight exposure to Australia contributed to performance. Conversely, our underweight exposures to Japan, Singapore and Canada weighed on performance.

On a stock level basis, our overweight allocations to Agnico Eagle Mines, Newmont and Pfizer contributed to performance. Conversely, our underweight exposures to Palantir Technologies and Tesla coupled with our overweight allocation to Tjx weighed on performance.
