Other securities will be duly screened by the Shariah Adviser based on MSCI Shariah screening methodology. Further information on MSCI Shariah screening methodology can be found on the MSCI website at www.msci.com/indexes/group/islamic-indexes.

Islamic deposits

Islamic deposits shall be placed with financial institutions licensed under the Islamic Financial Services Act 2013 and/or Financial Services Act 2013, whichever is appropriate. Cleansing / Purification Process for the Fund

a) Active Breach / Wrong Investment

Refers to Shariah non-compliant investment made by the Manager. The said investment will be disposed of / withdrawn with immediate effect or within a month of knowing the status of the investment. In the event of the investment resulted in gain (through capital gain and/or dividend) received before or after the disposal of the investment, the gain is to be channeled to *baitulmal* and/or any other charitable bodies as advised by the Shariah Adviser. The Fund has a right to retain only the investment cost. If the disposal of the investment resulted in losses to the Fund, the losses are to be borne by the Manager.

All costs incurred during the acquisition and disposal process, either the investment resulted in either gain or losses, are to be borne by the Manager.

b) Reclassification of Shariah Status of the Fund's Investment

A security which was reclassified as Shariah non-compliant by the SACSC and/or the Shariah boards of the relevant Islamic indices will be disposed of soonest practical. If the respective market price of the Shariah non-compliant securities exceeds or is equal to the investment cost, the Fund must liquidate them immediately. Any dividends received up to the effective date of reclassification and capital gains arising from the disposal of the Shariah non-compliant securities on the effective date of reclassification can be kept by the Fund. However, any dividends received and excess capital gain from the disposal of Shariah non-compliant securities after the effective date of reclassification should be channelled to *baitulmal* and/or charitable bodies as advised by the Shariah Adviser.

On the other hand, the Fund is allowed to hold its investment in the Shariah non-compliant securities if the market price of the said securities is below the investment cost. It is also permissible for the Fund to keep the dividends received during the holding period until such time when the total amount of dividends received and the market value of the Shariah non-compliant securities held equal the investment cost. At this stage, the Fund is to dispose of its holding.

Zakat for the Fund

The Fund does not pay zakat on behalf of Muslim individuals and Islamic legal entities who are investors of the Fund. Thus, investors are advised to pay zakat on their own.

What are the possible outcomes of my investment?

Best Case	Capital appreciation and income distribution.
Mid Case	No significant change in investment i.e. no capital appreciation and no income distribution.
Worst Case	Capital loss and with no income distribution.

What are the key risks associated with the Fund?

General risks associated with investing in a unit trust fund

Market Risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors resulting in a decline in a fund's NAV.
Inflation Risk	This is the risk that investors' investment in a fund may not grow or generate income at a rate that keeps pace with inflation.
Non-Compliance Risk	This is the risk of the manager, the investment manager or the trustee not complying with their respective internal policies, the deed and its supplemental deeds, securities law or guidelines issued by the regulators relevant to each party, which may adversely affect the performance of a fund.
Loan Financing Risk	This risk occurs when investors take a loan/financing to finance their investment. The inherent risk of investing with borrowed money includes investors being unable to service the loan repayments.
Country Risk	Investments of a fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the fund invests in.
Suspension Risk	Refers to situation where the Manager suspends dealings of units in a fund (no redemption or subscription are allowed) under exceptional circumstances as set out in the Prospectus - Temporary suspension of determination of NAV and of the issue, switching and redemption of units. Suspension of a fund may potentially result in unit holders not being able to redeem their units into cash based on their liquidity needs and their investments will continue to be subject to the risk factors inherent in the Fund.

Specific risks associated with the Fund

Currency Risk	As the investments of the Fund may be denominated in currencies other than the base currency of the Fund, any fluctuation in the exchange rate between the base currency of the Fund and the currencies in which the investments are denominated may have an impact on the value of these investments. Investors should be aware that if the currencies in which the investments are denominated depreciate against the base currency of the Fund, this will have an adverse effect on the NAV of the Fund in the base currency of the Fund and vice versa. Investors should note that any gains or losses arising from the fluctuation in the exchange rate may further increase or decrease the returns of the investment.
Company/Stock Specific Risk	Prices of a particular company/stock may fluctuate in response to the circumstances affecting individual companies such as adverse financial performance, news of a possible merger or loss of key personnel of a company. Any adverse price movements of such stock will adversely affect the NAV of the Fund.
Liquidity Risk	Liquidity risk refers to the ease of liquidating an asset depending on the asset's volume traded in the market. If the Fund holds assets that are illiquid, or are difficult to dispose of, the value of the Fund and consequently the value of the Unit Holders' investments in the Fund will be negatively affected when it has to sell such assets at unfavourable prices.
Shariah Non-Compliance Risk	<p>This is the risk of the Fund not conforming to Shariah Investment Guidelines. The appointed Shariah Adviser for the Fund would be responsible for ensuring that the Fund is managed and administered in accordance with Shariah Investment Guidelines. Note that as the Fund can only invest in Shariah-compliant instruments, Shariah non-compliance may adversely affect the NAV of the Fund when the rectification of Shariah non-compliance results in losses.</p> <p>If the Shariah non-compliance is due to active breach by the Investment Manager (i.e. buying a Shariah non-compliant investment), then any gain received arising from the disposal of the Shariah non-compliant investment shall be channeled to baitulmal and/or charitable bodies as advised by the Shariah Adviser; however, if there is a loss arising from the disposal, the Investment Manager shall bear the loss, subject to the consultation with the Shariah Adviser.</p>
Risk Associated with Investments in Shariah-compliant Equity-Related Securities	The Fund may also invest in Shariah-compliant equity-related securities such as Shariah-compliant warrants that are capable of being converted into shares. As Shariah-compliant warrants are linked to the particular Shariah-compliant equity securities from which they are derived, the Shariah-compliant warrants inherit the risks linked to that underlying Shariah-compliant equity security such as market risk, currency risk, industry risk and liquidity risk. For investments in Shariah-compliant warrants, a movement in the prices of the underlying securities of the Shariah-compliant warrants will generally result in a larger movement in the prices of the Shariah-compliant warrants, that is, higher volatility. In the event of a decline in the market, Shariah-compliant warrants can lose a substantial amount of their values, far more than the underlying securities and vice versa. Shariah-compliant warrants also have a limited life and if they are not exercised at the maturity, they will expire and become worthless causing the value of the Fund's investments to fall. Like any other investments, the fall in the value of the Fund's investments will ultimately lower the NAV.
Reclassification of Shariah Status Risk	This risk refers to the risk that the currently held Shariah-compliant equities in the Fund may be reclassified as Shariah non-compliant in the periodic review of the equities by the SACSC, the Shariah Adviser or the Shariah boards of the relevant Islamic indices. If this occurs, the Investment Manager will take the necessary and allowable steps to rectify the non-compliance by taking into consideration the interests of the Unit Holders.

Concentration Risk	This is the risk that the Fund may be overly concentrated in a few countries, industries or segment of economy. As such, developments affecting any of those countries, industries or segments of economy may affect the NAV of the Fund more adversely as compared to other funds that are more diversified across. This risk may be mitigated by diversifying the investment across different regions, industries and segments of the economy.
--------------------	--

Note: The abovementioned risks which investors should consider before investing into a unit trust fund should not be considered to be an exhaustive list. Investors should be aware that investments in the Fund may be exposed to other unforeseeable risks from time to time. Investors are advised to consult their professional adviser. Please refer to the Prospectus under "Risk Factors" for further details on risks.

Please note that if you invest in units through a distributor via a nominee system of ownership, you will not be deemed a unit holder under the deed of the Fund.
