What is the Fund about?

Income and Growth Fund is a wholesale feeder fund issued by AmFunds Management Berhad (the "Manager") that seeks to provide regular income* and to a lesser extent long-term** capital appreciation by investing in the Allianz Income and Growth (the "Target Fund") which invests in equities, debt securities and convertible securities.

Who is the Fund suitable for?

The Fund is suitable for Sophisticated Investors seeking:

- regular income* and to a lesser extent long-term** capital appreciation on their investments; and
- an investment portfolio of equities, debt securities and convertible securities.

Notes:

*Income distribution (if any) is paid out on a quarterly basis.

**Long-term refers to an investment horizon of at least five (5) years.

What am I investing in?

Fund Category	Wholesale (Feeder Fund)											
Fund Type	Income and Growth											
Investment Objective	The Fund seeks to provide regular income* and to a lesser extent long-term** capital appreciation by investing in the Target Fund which will be investing in equities, debt securities and convertible securities. <i>Notes:</i> <i>*Income distribution (if any) is paid out on a quarterly basis.</i> <i>**Long-term refers to an investment horizon of at least five (5) years.</i> <i>Any material change to the investment objective of the Fund would require unit holders' approval.</i>											
Investment Strategy	The Fund seeks to achieve its investment objective by investing a minimum of 85% of the Fund's net asset value (NAV) in the Allianz Income and Growth ("Target Fund") at all times. This implies that the Fund has a passive strategy. <i>Note:</i> <i>A replacement of the Target Fund or termination of the Fund would require unit holders' approval.</i>											
Asset Allocation	• A minimum of 85% of the Fund's NAV will be invested in the Target Fund. • Up to 15% of the Fund's NAV in liquid assets.											
Base Currency of the Fund	US Dollar (USD)											
Performance Benchmark	S&P 500 Index (available at www.aminvest.com) <i>Note:</i> <i>The Target Fund is not benchmarked externally as its primary objective is to meet its targeted monthly distribution, while providing capital appreciation. For comparative purposes only as it relates to upside and downside equity market capture, the S&P 500 Index can be referenced. The risk profile of the Fund is not the same as the risk profile of the reference benchmark.</i>											
Launch Date	20 January 2020											
Initial Offer Price	<table><tr><th>USD Class</th><th>RM-Hedged Class</th><th>AUD-Hedged Class</th><th>SGD-Hedged Class</th></tr><tr><td>USD 1.0000</td><td>RM 1.0000</td><td>AUD 1.0000</td><td>SGD 1.0000</td></tr></table>				USD Class	RM-Hedged Class	AUD-Hedged Class	SGD-Hedged Class	USD 1.0000	RM 1.0000	AUD 1.0000	SGD 1.0000
USD Class	RM-Hedged Class	AUD-Hedged Class	SGD-Hedged Class									
USD 1.0000	RM 1.0000	AUD 1.0000	SGD 1.0000									
Distribution Policy	<u>RM-Hedged Class</u> Distribution, if any, will be made on a monthly basis and can be in the form of cash (by telegraphic transfer) or unit (by reinvestment into units of the Class) <u>Other Classes</u>											

	Distribution, if any, will be made on a monthly basis and will be reinvested into the respective Classes. However, the Manager may at its sole discretion allow distribution in the form of cash. At the Manager's discretion, the Fund may distribute from its gain, income and capital. The rationale for distribution out of capital is to allow the Fund the ability to (i) distribute income on a regular basis in accordance with the distribution policy of the Fund or (ii) increase the amount of distributable income to the unit holders, after taking into consideration the risk of distributing out of capital. Distribution out of the Fund's capital has the effect of lowering the NAV of the Fund, may reduce part of the unit holders' original investment and may also result in reduced future returns to unit holders. When a substantial amount of the original investment is being returned to the unit holders, it has a risk of eroding the capital of the Fund and may, over time, cause the NAV of the Fund to fall. The greater the risk of capital erosion that exists, the greater the likelihood that, due to capital erosion, the value of future returns would also be diminished. <i>Notes:</i> <i>Distribution amount (if any) for each of the Classes could be different subject to the sole discretion of the Manager.</i> <i>If distribution earned does not exceed the amount 500 in the currency of the respective Class(es), it will be automatically reinvested.</i>

What are the key risks associated with the Fund?

General risks associated with investing in a wholesale fund

Country Risk	Investments of the fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which the fund invests in.
Inflation Risk	This is the risk that Sophisticated Investors' investment in the fund may not grow or generate income at a rate that keeps pace with inflation.

Manager's Risk	This risk refers to the day-to-day management of the fund by the manager which will impact the performance of the fund.
Market Risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors resulting in a decline in the fund's net asset value.
Mismatch Risk	The choice of investing in the Fund is made at the discretion of investors. Mismatch risk is the risk that the Fund chosen may not be suitable for the needs and circumstances of the investor.
Non-Compliance Risk	This is the risk of the manager or the trustee not complying with their respective internal policies, the deed and its supplemental deed, securities law or guidelines issued by the regulators relevant to each party, which may adversely affect the performance of the fund.

Specific risks associated with the Fund

Currency Risk	As the investments of the Fund may be denominated in currencies other than the base currency, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments. The Manager may at its discretion hedge the currency exposure of any of the Class(es) against the base currency of the Fund to mitigate currency risk for the benefit of the Class(es).
Distribution Risk	It should be noted that the distribution of income is not guaranteed. Circumstances preventing the distribution of income include, among others, insufficient realised gains or realised income to enable income distribution. The Fund may distribute from its realised gain, realised income and capital. Capital distributions represent a return or withdrawal of part of the amount of your original investment and/or capital gains attributable to the original investment and will result in a reduction in the NAV per unit of the Fund and reduce the capital available for future investment and capital growth. Future capital growth may therefore be constrained.
Liquidity Risk	The Fund will be investing a minimum of 85% of its NAV in the Target Fund. There may be exceptional circumstances, which could cause delays in the redemption of shares of the Target Fund and units of the Fund.
Regulatory and Legal Risk	The value of the Fund's investment may be affected by uncertainties such as political developments, changes in government policies, changes in taxation, restrictions on repatriation of investment proceeds and other developments in the law and regulations of Luxembourg in which the Fund's investments are made.
Risk of a Passive Strategy	As the Fund adopts a passive strategy of investing a minimum of 85% of its NAV into the Target Fund at all times, this strategy would result in the Fund being exposed to the risk of its NAV declining when the Target Fund's net asset value declines
Risk of Not Meeting the Fund's Investment Objective	This is the risk that the Fund may deviate from the intended investment objective.
Taxation Risk	This is the risk that the proceeds from the sale of securities and/or the receipt of income may be subject to tax, levies, duties or other charges imposed by the authorities in Luxembourg. Tax law and practice in Luxembourg may not be clearly established.
