### What is the Fund about?

The Fund is an equity feeder fund issued by AmFunds Management Berhad (the "Manager") that seeks long-term\*\* capital appreciation by investing its assets in quoted equity securities of companies or Real Estate Investment Trust (REITs) (or its equivalent) having their registered office in the EEA (European Economic Area) or United Kingdom if it's not part of the EEA and listed or traded on a regulated market which derive the main part of their revenue from the ownership, management and/or development of real estate in Europe. The Fund is denominated in Ringgit Malaysia (RM).

### Who is the Fund suitable for?

The Fund is suitable for investors seeking:

- potential long-term\*\* capital appreciation through Pan European property related securities.
- potential income\* and capital growth through exposure to property related security.

Notes:

\* The income (if any) could be in the form of units or cash.

\*\* long-term refers to a period of at least five (5) years.

### What am I investing in?

Fund Category	Feeder (European property equity).
Fund Type	Capital growth and income.
Investment Objective	To seek long-term capital appreciation by investing its assets in quoted equity securities of companies or REITs (or its equivalent) having their registered office in the EEA (European Economic Area) or United Kingdom if it's not part of the EEA and listed or traded on a regulated market which derive the main part of their revenue from the ownership, management and/or development of real estate in Europe. The Fund is denominated in RM.  <i>Note: Any material change to the investment objective of the Fund would require unit holders' approval.</i>
Investment Strategy	A minimum of 85% of the Fund's net asset value ("NAV") will be invested in the share class denominated in Euro of the Janus Henderson Horizon Pan European Property Equities Fund (the "Target Fund").
Asset Allocation	<ul style="list-style-type: none"> <li>• At least 85% of the Fund's NAV will be invested in the Target Fund; and</li> <li>• Up to 15% of the Fund's NAV will be invested in liquid assets for liquidity purposes.</li> </ul>
Base Currency	Ringgit Malaysia (RM).
Performance Benchmark	FTSE EPRA/NAREIT Developed Europe Capped Index Net TRI <sup>1</sup> . (obtainable from: <a href="http://www.aminvest.com">www.aminvest.com</a> )  <i>Note: The Fund adheres to the benchmark of the Target Fund. The risk profile of the performance benchmark is not the same as the risk profile of the Fund.</i>
Launch Date	6 March 2007
Distribution Policy	Subject to the availability of income, distribution will be made at least once every year.  At the Manager's discretion, the Fund may distribute from its gain, income and capital. The rationale for distribution out of capital is to allow the Fund the ability to (i) distribute income on a regular basis in accordance with the distribution policy of the Fund or (ii) increase the amount of distributable income to the unit holders, after taking into consideration the risk of distributing out of capital.  Distribution out of the Fund's capital has the effect of lowering the NAV of the Fund, may reduce part of the unit holders' original investment and may also result in reduced future returns to unit holders. When a substantial amount of the original investment is being returned to the unit holders, it has a risk of eroding the capital of the Fund and may, over time, cause the NAV of the Fund to fall. The greater the risk of capital erosion that exists, the greater the likelihood that, due to capital erosion, the value of future returns would also be diminished.

Best Case	Capital appreciation and income distribution.
Mid Case	No significant change in investment i.e. no capital appreciation and no income distribution.
Worst Case	Capital loss and with no income distribution.

## What are the key risks associated with the Fund?

### General risks associated with investing in a unit trust fund

Market Risk	Market risk refers to the possibility that an investment will lose value because of a general decline in financial markets, due to economic, political and/or other factors resulting in a decline in a fund's NAV.
Inflation Risk	This is the risk that investors' investment in a fund may not grow or generate income at a rate that keeps pace with inflation.
Non-Compliance Risk	This is the risk of the manager, the investment manager or the trustee not complying with their respective internal policies, the deed and its supplemental deed, securities law or guidelines issued by the regulators relevant to each party, which may adversely affect the performance of a fund.
Loan Financing Risk	This risk occurs when investors take a loan / financing to finance their investment. The inherent risk of investing with borrowed money includes investors being unable to service the loan repayments.
Country Risk	Investments of a fund in any countries may be affected by changes in the economic and political climate, restriction on currency repatriation or other developments in the law or regulations of the countries in which a fund invests in.
Suspension risk	Refers to situation where the Manager suspends dealings of units in a fund (no redemption or subscription are allowed) under exceptional circumstances as set out in the Prospectus - Temporary suspension of

	determination of NAV and of the issue, switching and redemption of units. Suspension of a fund may potentially result in unit holders not being able to redeem their units into cash based on their liquidity needs and their investments will continue to be subject to the risk factors inherent in the Fund.
--	---

#### **Specific risks associated with the Fund**

Industry Specific Risk	As the Fund invests in the Target Fund which primarily invests in securities in a particular industry, the Fund may be indirectly affected by risk specific to the industry in which the Target Fund invests.
Currency Risk	As the investments of the Fund will be denominated in currencies other than the base currency, any fluctuation in the exchange rate between the base currency and the currencies in which the investments are denominated may have an impact on the value of these investments.
Risk of a Passive Strategy	As the Fund adopts a passive strategy of investing a minimum of 85% of its NAV into the Target Fund at all times, this strategy would result in the Fund being exposed to the risk of its NAV declining when the Target Fund's NAV declines.
Risk of not meeting the Fund's Investment Objective	This is the risk that the Fund may deviate from the intended investment objective.
Counterparty Credit Risk	Counterparty credit risk is the risk arising from the possibility that the counterparty may default or not able to fulfill a trade settlement prior or on the settlement date of the trade. This could adversely affect the value of the Fund.

#### **Specific risks associated with the Target Fund**

Securities Lending	The Target Fund may engage in securities lending. Under such arrangements, the Target Fund will have a credit risk exposure to the counterparties to any securities lending agreements. The extent of this credit risk can be reduced, by receipt of adequate collateral of a sufficiently high quality.
Geopolitical Risk	Geopolitical risk may arise as a result of political changes or instability in a country. Any change in the laws, regulations, government policies, political or economic climate of that country may cause increased volatility, liquidity, price and foreign exchange risk associated with investments within the country or region where the geopolitical situation arises. The impact of geopolitical risk is considered to be long-term, as the risk rises over time, given the greater potential for events and changes over time. The effect of any future political change is difficult to predict.
Investing in Emerging Markets	Investments in emerging markets may be more volatile than investments in more developed markets. Some of these markets may have relatively unstable governments, economies based on only a few industries and securities markets that trade only a limited number of securities. Many emerging markets do not have well-developed regulatory systems and disclosure standards may be less stringent than those of developed markets. The risks of expropriation, nationalisation and social, political and economic instability are greater in emerging markets than in more developed markets.
Investing in Derivatives	A derivative is a financial instrument which provides a return linked to any of the transferable securities that the Target Fund is permitted to invest in. Whilst the prudent use of derivatives can be beneficial, derivatives also involve risks different from, and, in certain cases, greater than, the risks presented by more traditional investments. Derivatives do not always perfectly or even highly correlate or track the value of the securities, rates or indices they are designed to track. Consequently, the Target Fund's use of derivative techniques may not always be an effective means of, and sometimes could be counter-productive to, following the Target Fund's investment objective increasing the risk of investment losses.

**Note: The abovementioned risks which investors should consider before investing into the Fund should not be considered to be an exhaustive list. Investors should be aware that investments in the Fund may be exposed to other unforeseeable risks from time to time. Investors are advised to consult their professional adviser. Please refer to the Prospectus under "Risk Factors" and "The Information on the Target Fund" for further details on risks.**

**Please note that if you invest in units through a distributor via a nominee system of ownership, you will not be deemed a unit holder under the deed of the Fund.**
