The returns presented are net of all relevant fees, charges, and costs associated with the exchange-traded fund investment. These may include, but are not limited to, management fees, trustee fees, and other applicable charges. Over time, such fees and charges can materially reduce the overall returns on your investment.

It is important to note that the sales charge is deducted upfront and directly reduces the amount of the initial investment that is allocated to the fund, which in turn can have the effect of lowering returns to investors in the long run. These costs may be deducted from your investment amount, from the returns generated, or directly from the Fund's assets, and are reflected in the unit price (NAV per unit). This includes expenses related to the marketing and distribution of the Fund. Additionally, all fees and charges payable to the Manager and the Trustee are subject to applicable taxes and/or duties, which may vary from time to time as imposed by the government.

Given the impact these costs can have on your investment returns, investors are strongly advised to read and understand the contents of the Fund's prospectus and consider the cumulative impact of these costs before making any investment decision.

Past performance is not necessarily indicative of future performance and that unit prices and investment returns may go down, as well up.
